

## Note

The following summary Table, produced daily, provides traffic trend information derived from a small sample set of traffic counters located on the national road network.

The information below covers the morning period from 7am until 10am. The trend for car traffic from this period of the day generally correlates closely with the overall daily trend in car traffic at each location.

### **Introductory Remarks**

- Traffic figures are measured from 7am to 10am so as to provide an early indicator each day.
- Weekly heavy goods vehicle traffic has remained largely stable and accordingly the daily figures provided are for cars only.
- The changes recorded day-to-day are not cumulative – they compare only the current day's figures versus the same day in the previous week, the same day last year and with the same day prior to the introduction of Level 3 restrictions on 7<sup>th</sup> October (i.e. Wed 30<sup>th</sup> Sept to Tues 6<sup>th</sup> Oct).
- Initial restrictions were put in place on Thursday 12<sup>th</sup> March 2020. Countrywide Level 5 restrictions were in place from Friday 30<sup>th</sup> October to Tuesday 1<sup>st</sup> December and were reintroduced on 31<sup>st</sup> December 2020.

### **Daily Data for Monday 10<sup>th</sup> May**

- Monday 03<sup>rd</sup> May 2021 was a Bank Holiday and as such the comparison with the '**same day last week**' has been left blank as that comparison is not meaningful.
- For the M50, today's traffic comparison was switched from the N4-N3 to the N3-N2 as there was a problem with the data collection on the morning of the 11/05/2020.
- In general, this morning's traffic volumes show most of the traffic counters are now above the levels experienced before the introduction of Level 3 restrictions in October of last year.
- Car traffic just south of the Northern Ireland Border on the N1 at Jonesboro shows a +7% increase since the start of the October Level 3 restrictions.
- In the case of the non-motorway border counter sites, traffic volumes today show changes in car traffic volumes since the application of October Level 3 restrictions ranges from -4% on the N16 east of Manorhamilton to +23% on the N3 north of Belturbet. It should be noted that traffic volumes at the N2, N3, N14, N15 and N16 counters are lower than at the motorway traffic counters and are likely to display wider fluctuations in traffic figures than other traffic counters.
- Traffic volumes on the radial routes into Dublin, comparisons with the same day prior to the start of the October Level 3 restrictions are as follows: 0% on the M1 at M50 to Airport, +5% on the M11 at Bray, +6% on the M4 at Celbridge-Maynooth, and +5% on the N7 at Citywest.
- The M50 (N2 Finglas to N3 Navan Road) shows a +7% increase as compared with pre-Level 3 traffic.
- In the case of the regional cities the changes in car traffic volumes this morning as compared with the same day prior to the start of the October Level 3 restrictions are as follows: N6 Bóthar na dTreabh Galway +3%, N40 Cork -2%, M9 Waterford -7% and M7 Limerick -3%.
