

Note

The following Table provides traffic trend information derived from a small sample set of traffic counters located on the national road network.

The information below covers the morning period from 7am until 10am. The trend for car traffic from this period of the day generally correlates closely with the overall daily trend in car traffic at each location.

This summary is produced daily.

Introductory Remarks

- In the initial three weeks following the introduction of the March 27th restrictions, traffic volumes were very consistent. Overall traffic volumes were typically down approximately 65-70% across the national road network.
- From Tuesday 21st April, an upward trend in car traffic volumes became apparent.
- In response, daily traffic figures are being provided in order to more closely monitor the trends. Traffic figures are measured from 7am to 10am so as to provide an early indicator each day.
- Weekly heavy goods vehicle traffic has remained largely stable and accordingly the daily figures provided are for cars only.
- The changes day-to-day are not cumulative – they compare only the current day's figures versus the same day in the previous week and the same day last year.

Daily Data for Wednesday June 24th June

- Car traffic volumes today at the sample counters show either very low growth as compared with Wednesday 17th June. This continues the trend of lower levels of growth observed at the sample traffic counters over the last week.
- Overall, car traffic today is typically down by between 34% and 48% of the volumes of one year ago, across the sampled traffic counters.
- Car traffic just south of the Northern Ireland Border on the N1 at Jonesboro is up 6% today as compared with Wednesday 17th June. The overall reduction in car traffic at this counter is now 48%.
- Car traffic volumes on the radial routes into Dublin show an increase this morning as compared with Wednesday of last week of between 4% and 8%. Car traffic is up 8% on the M4 at Celbridge-Maynooth, 8% on the M11 at Bray, 5% on the N7 at Citywest, and 4% on the M1 at Swords to Airport. These growth figures are marginally higher than yesterday's and generally consistent with growth levels experienced last week.
- The M50 (N3 Navan Road to N4 Galway Road) shows a 5% increase as compared with Wednesday 17th June. This is consistent with the growth rates recorded today on the radial approach routes.
- In the case of the regional cities the increase in car traffic volumes this morning as compared with Wednesday 17th June is as follows: N6 Bóthar na dTreabh Galway 6%, M9 Waterford 4%, M7 Limerick 3%, and N40 Cork 1%. These figures are somewhat higher than the growth rates experienced earlier this week.
