

## Note

The following Table provides traffic trend information derived from a small sample set of traffic counters located on the national road network.

The information below covers the morning period from 7am until 10am. The trend for car traffic from this period of the day generally correlates closely with the overall daily trend in car traffic at each location.

This summary is produced daily.

			
<b>Transport Infrastructure Ireland</b>			
<b>National Road Car Traffic Report</b>			
<b>Morning Period (7am – 10am)</b>			
<b>Monday 25<sup>th</sup> May 2020</b>			
<b>Traffic Counter</b>	<b>Traffic Volume (Cars Only)</b>	<b>Comparison with same day 2019</b>	<b>Comparison with same day last week</b>
M50 J6-J7 (N3 Navan Road to N4 Galway Road)	12,466	-54%	+11%
M1 North of J20 (South of Border at Jonesboro)	1,212	-59%	+3%
M1 J2-J3 (Dublin Airport to Swords)	9,831	-48%	+6%
M4 J6-J7 (Between Celbridge and Maynooth)	5,484	-45%	+9%
N6 Bóthar na dTreabh, Galway	2,357	-49%	+6%
M7 J29-J30 Limerick SRR (Ballysimon to Rosbrien)	4,108	-56%	+9%
N7 J3-J4 (Citywest)	9,383	-46%	+7%
M9 J11-J12 (Mullinavat to Waterford)	1,083	-53%	+6%
M11 J5-J6 (Between Bray North and Bray Central)	6,202	-55%	+10%
N40 Cork SRR (Kinsale Road to Douglas)	8,786	-50%	+10%

### **Introductory Remarks**

- In the initial three weeks following the introduction of the March 27<sup>th</sup> restrictions, traffic volumes were very consistent. Overall traffic volumes were typically down approximately 65-70% across the national road network.
- From Tuesday 21<sup>st</sup> April, an upward trend in car traffic volumes became apparent.
- In response, daily traffic figures are being provided in order to more closely monitor the trends. Traffic figures are measured from 7am to 10am so as to provide an early indicator each day.
- Weekly heavy goods vehicle traffic has remained largely stable and accordingly the daily figures provided are for cars only.
- The changes day-to-day are not cumulative – they compare only the current day's figures versus the same day in the previous week and the same day last year.

### **Daily Data for Monday 25<sup>th</sup> May**

- The increase in car traffic volumes today as compared with Monday 18<sup>th</sup> May continues the trend of increased traffic growth that has been apparent in recent weeks but is reduced as compared with last week's growth levels.
- Overall, car traffic today is typically down by between 45% and 59% of the volumes of one year ago, across the sampled traffic counters. However, the reduction in car traffic is diminishing and traffic volumes are showing a progressive increase as compared with the traffic volumes recorded in the immediate aftermath of the 27<sup>th</sup> March restrictions.
- Traffic just south of the Northern Ireland Border on the N1 at Jonesboro is up 3% as compared with Monday 18<sup>th</sup> May. This is significantly below the rate of growth experienced last week. Traffic is 59% lower than the same day last year at this counter.
- Car traffic volumes on the radial routes into Dublin show an increase this morning as compared with Monday of last week of between 6% and 10%. Car traffic is up 10% on the M11 at Bray, 9% on the M4 at Celbridge-Maynooth, 7% on the N7 at Citywest and 6% on the M1 at Swords to Airport. These figures are approximately one third of the growth levels experienced last week.
- The M50 (N3 Navan Road to N4 Galway Road) shows a 11% increase as compared with Monday 18<sup>th</sup> May. This is approximately one third the rate of car traffic growth on the M50 experienced last week and is consistent with traffic growth rates today on the radial routes approaching the M50.
- In the case of the regional cities the increase in car traffic volumes this morning as compared with Monday of last week are as follows: N40 Cork 10%, M7 Limerick 9%, N6 Bóthar na dTreabh Galway 6% and M9 Waterford 6%. These traffic growth levels continue the growth trend evident in recent weeks but are lower than the growth rates experienced last week.

As a general conclusion, this morning's increase in car traffic across the sample sites is approximately one third of the rates of growth experienced last week.
