

Note

The following summary Table, produced daily, provides traffic trend information derived from a small sample set of traffic counters located on the national road network.

The information below covers the morning period from 7am until 10am. The trend for car traffic from this period of the day generally correlates closely with the overall daily trend in car traffic at each location.

Introductory Remarks

- Traffic figures are measured from 7am to 10am so as to provide an early indicator each day.
- Weekly heavy goods vehicle traffic has remained largely stable and accordingly the daily figures provided are for cars only.
- The changes recorded day-to-day are not cumulative – they compare only the current day's figures versus the same day in the previous week, the same day last year and with the same day prior to the introduction of Level 3 restrictions on 7th October (i.e. Wed 30th Sept to Tues 6th Oct).
- Initial restrictions were put in place on Thursday 12th March 2020. Countrywide Level 5 restrictions were in place from Thursday 29th October to Tuesday 1st December and were reintroduced on 31st December 2020.

Daily Data for Monday 31st May

- Mondays 03/06/2019 and 01/06/2020 were both Bank Holidays and as such the comparisons with the same day in 2019 and 2020 are not meaningful. Monday 31st May is a Bank Holiday in Northern Ireland.
- In general, this morning's traffic volumes show a similar level of traffic volumes as compared with one week previously, Monday 24th May 2021. Traffic volumes across most of the traffic counters are at or above levels experienced before the introduction of Level 3 restrictions in October of last year.
- Car traffic just south of the Northern Ireland Border on the N1 at Jonesboro shows a -19% decrease as compared with Monday 24th May and a -14% decrease since the start of the October Level 3 restrictions. The reduction as compared with last week can be attributed to the Bank Holiday in Northern Ireland today.
- In the case of the non-motorway border counter sites, traffic volumes today show changes of between -19% and -4% as compared with Monday 24th May. The changes in car traffic volumes since the application of October Level 3 restrictions ranges from -18% on the N16 east of Manorhamilton to +2% on the N15 south of Lifford. It should be noted that traffic volumes at the N2, N3, N14, N15 and N16 counters are lower than at the motorway traffic counters and are likely to display wider fluctuations in traffic figures than other traffic counters.
- Traffic volumes on the radial routes into Dublin, comparisons with Monday 24th May are as follows: +1% on the M1 at M50 to Airport, -2% on the N7 at Citywest, 0% on the M11 at Bray and 0% on the M4 at Celbridge-Maynooth. Comparisons with the same day prior to the start of the October Level 3 restrictions are as follows: +2% on the M1 at M50 to Airport, +3% on the M11 at Bray, +7% on the M4 at Celbridge-Maynooth, and +7% on the N7 at Citywest.
- The M50 (N3 Navan Road to N4 Galway Road) shows a -1% decrease as compared with Monday 24th May and a +9% increase as compared with pre-Level 3 traffic.
- In the case of the regional cities the changes in car traffic volumes this morning as compared with Monday 24th May are as follows: N6 Bóthar na dTreabh Galway +1%, N40 Cork -6%, M9 Waterford -2%, and M7 Limerick -6%. Comparisons with the same day prior to the start of the October Level 3 restrictions are as follows: N6 Bóthar na dTreabh Galway +2%, N40 Cork -7%, M9 Waterford -1% and M7 Limerick -6%.
