

# The Role of TII and Local Authorities in Achieving *Vision Zero*

*(Road Safety Targets on National Roads)*

*Alastair DeBeer*

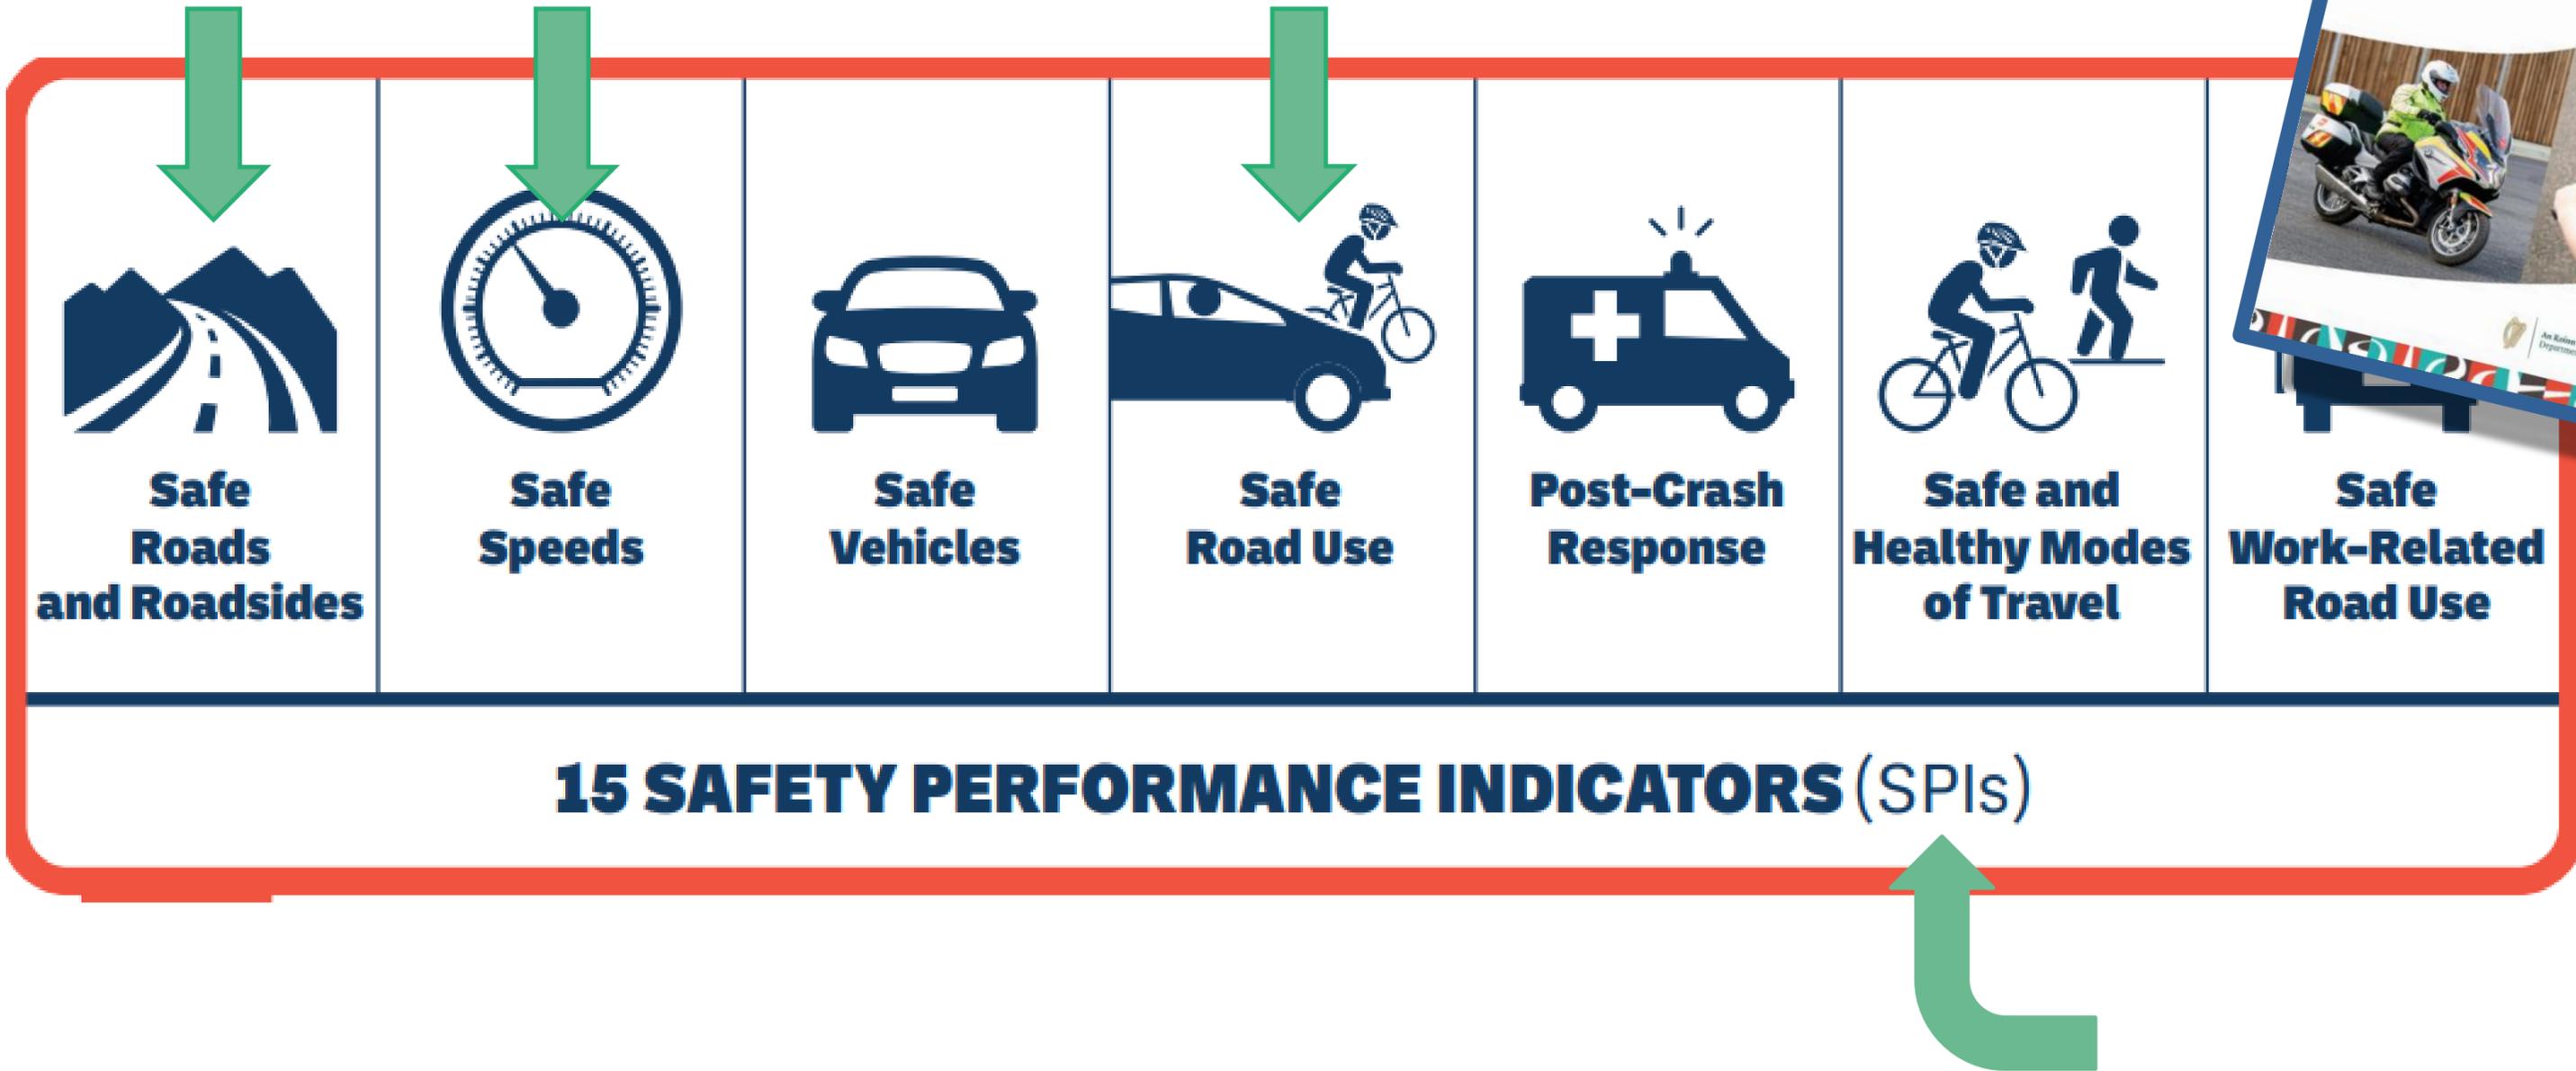

*Dr. Suzanne Meade*

**Session 5: 29<sup>th</sup> September 2023**

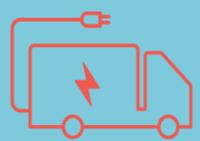

# Vision Zero - Safe Systems Approach

The Seven Pillars are:

# Overview

1. Role of TII Road Safety
2. Safety Trends and Rating (**Action 1 & 2 - RSS**)
3. Speed Limit Review (**Action 6 - RSS**)
4. TII Park and Share Programme (**Action 71 - RSS**)
5. Speed Management – Average Speed Cameras (**Action 8 - RSS**)
6. Dedicated Road Safety Engineer resource (**Action 63 – RSS**)
7. ***Next Steps***

# Role of TII Road Safety

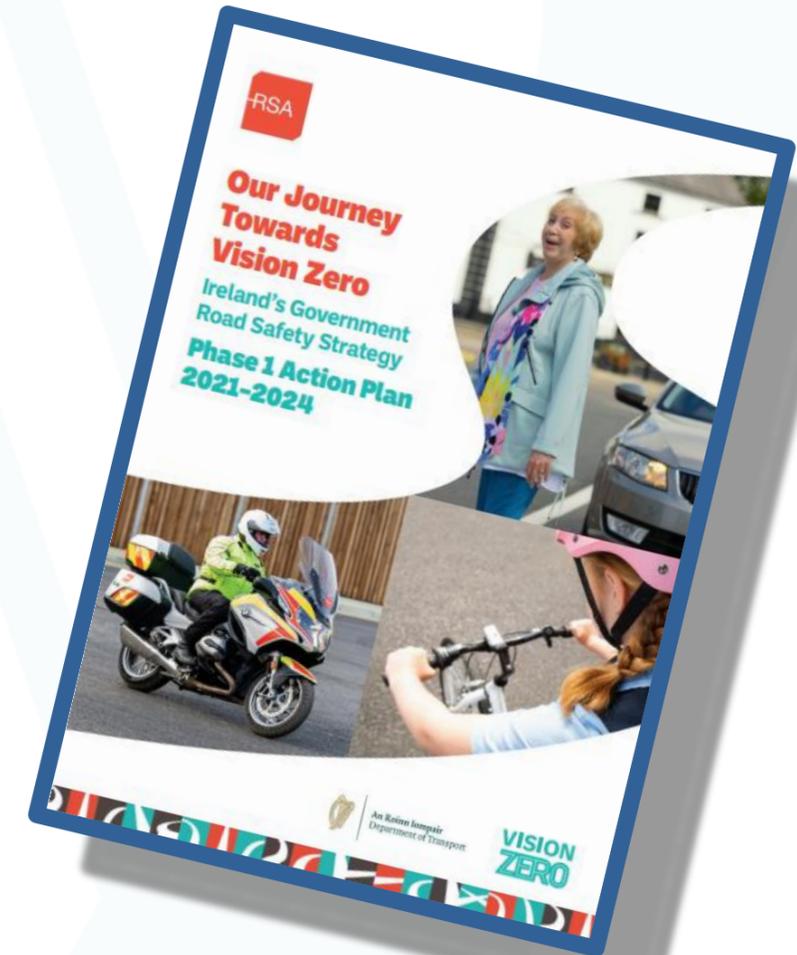

**Aim:** Reduce collisions on National Road Network

## Legislation and Policy:

- TII Statement of Strategy
- EU Directive on Road Infrastructure Safety Management (EU RISM), transposed by S.I No. 612 of 2021
- Government's Road Safety Strategy (2021-2030)

## Role:

- Identifying safety issues by proactive and reactive analysis,
- Funding safety improvement schemes through Local Authorities (Action 2 of RSS)
- Overseeing Road Safety Audit Team approvals and training
- Other: Data Analysis, Road Safety Impact Assessments, Road Works Portal, Geometric Standards, Research, training.

**VISION  
ZERO**  
NO ROAD DEATHS  
OR SERIOUS INJURIES BY 2050

# National Road Network

## ✓ *Safety Trends*

# Collisions Trends road networks (2019 to 2022) by Broad Collision Type

Head-On

NMU

Vehicle to Vehicle

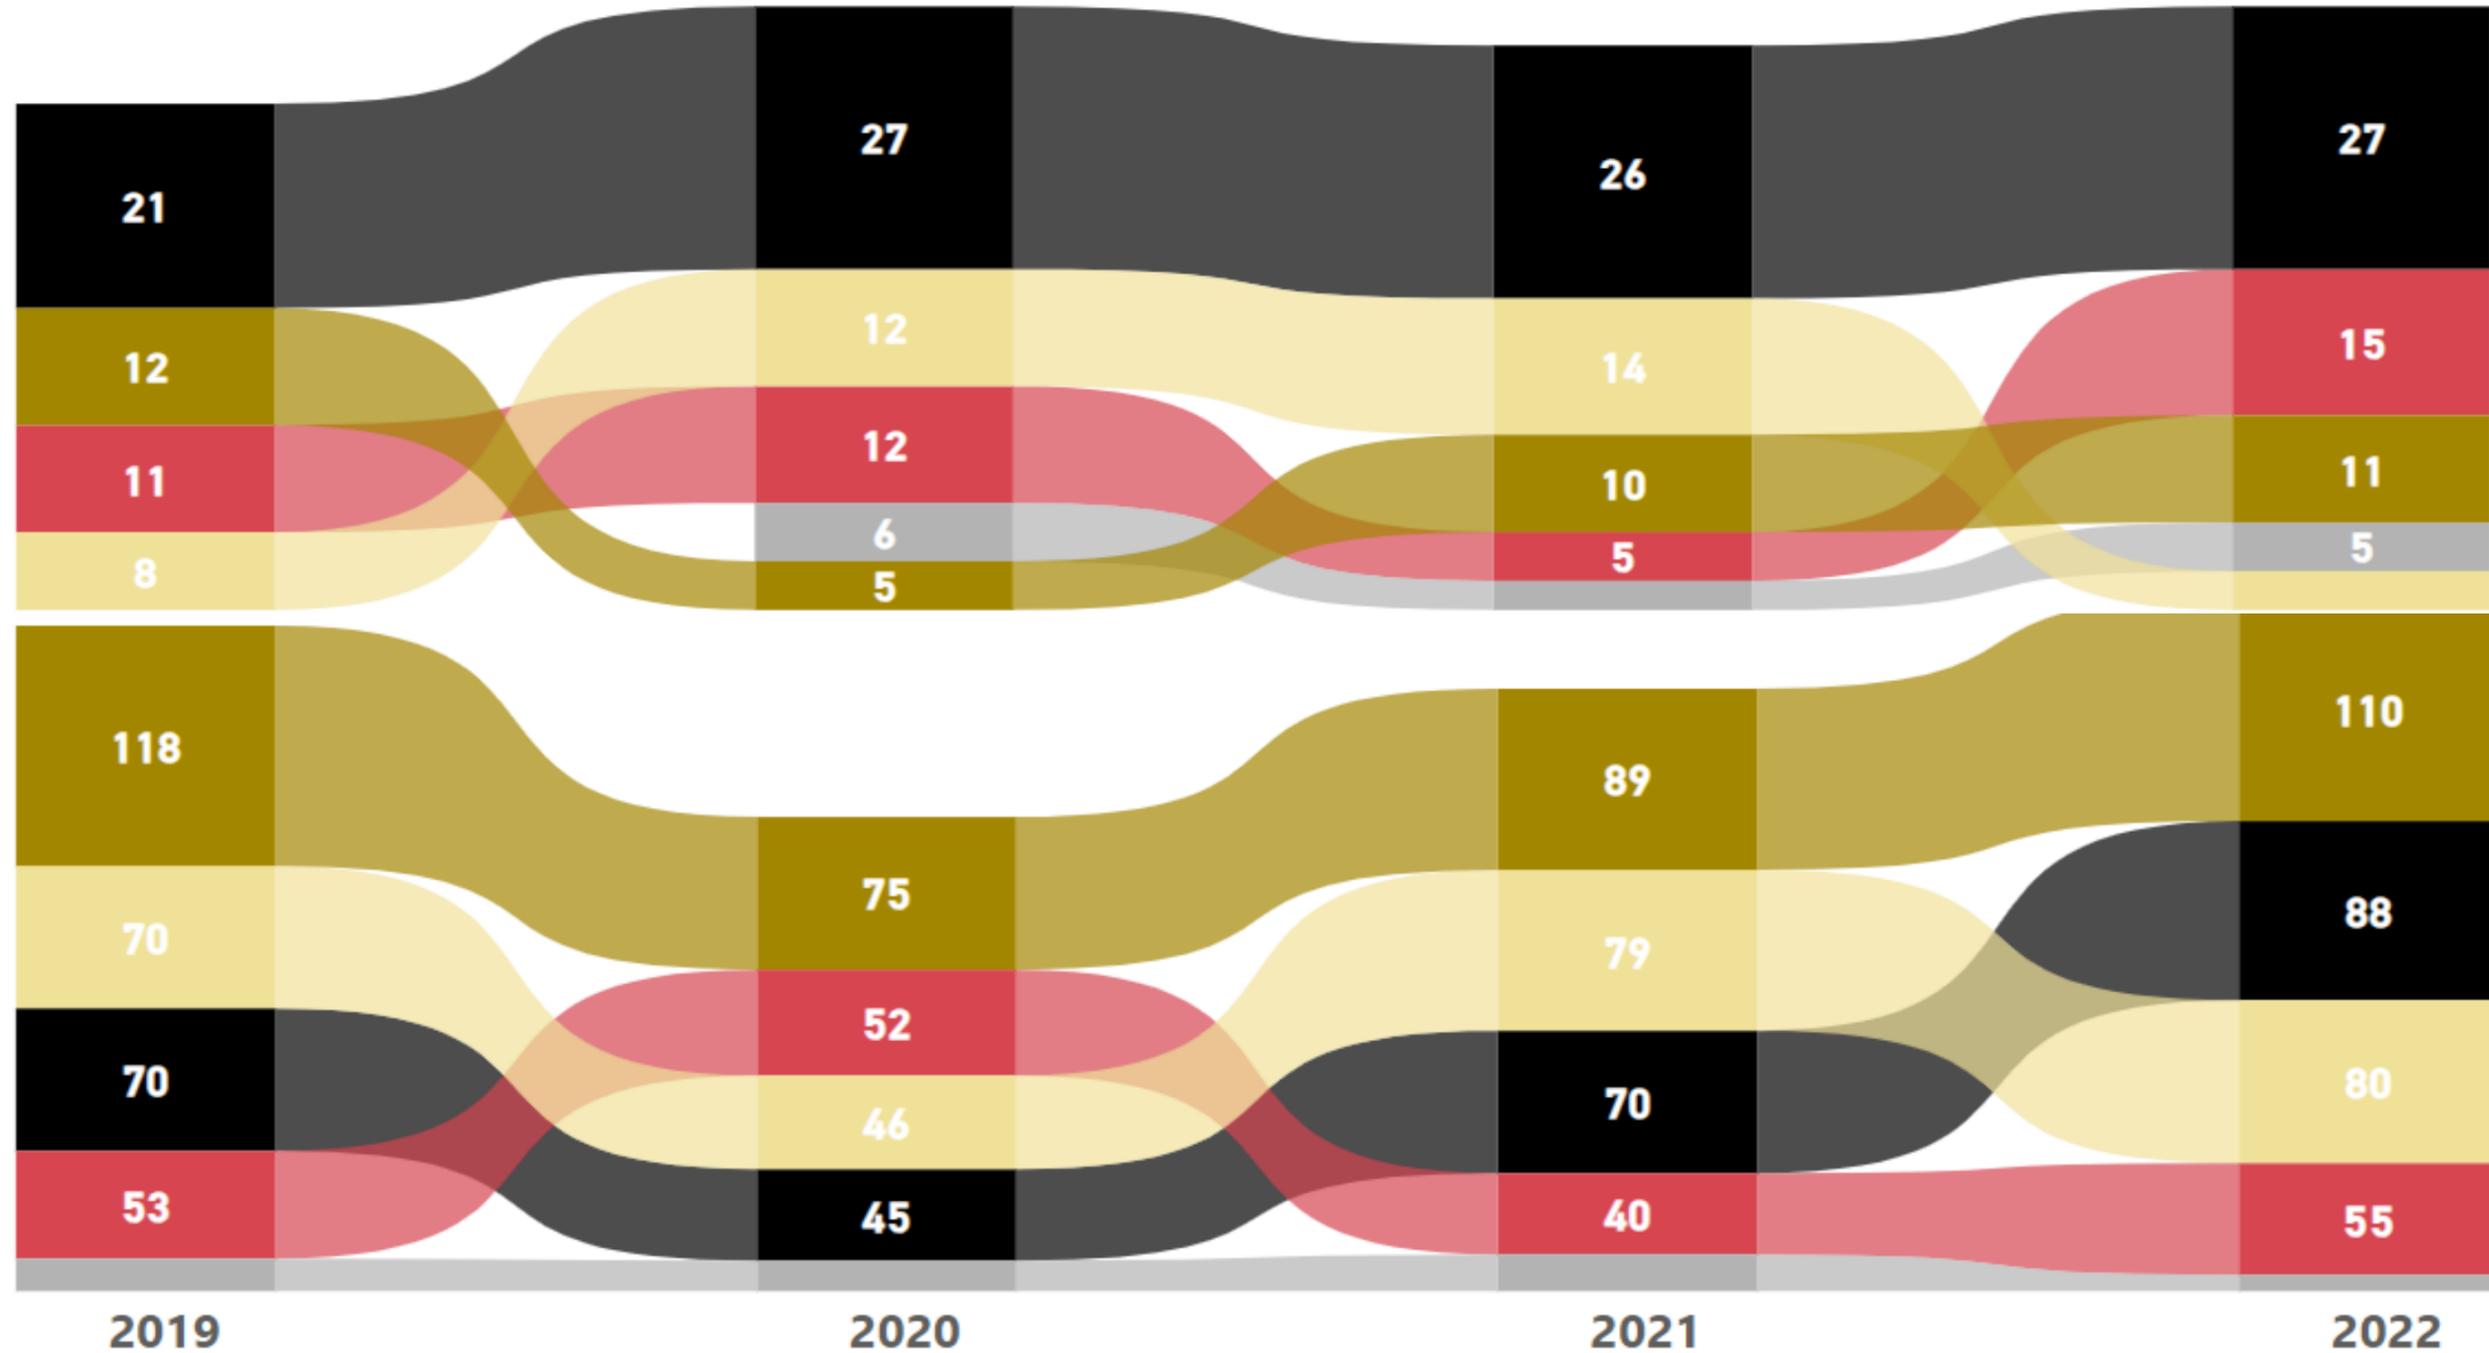

SVC

Other

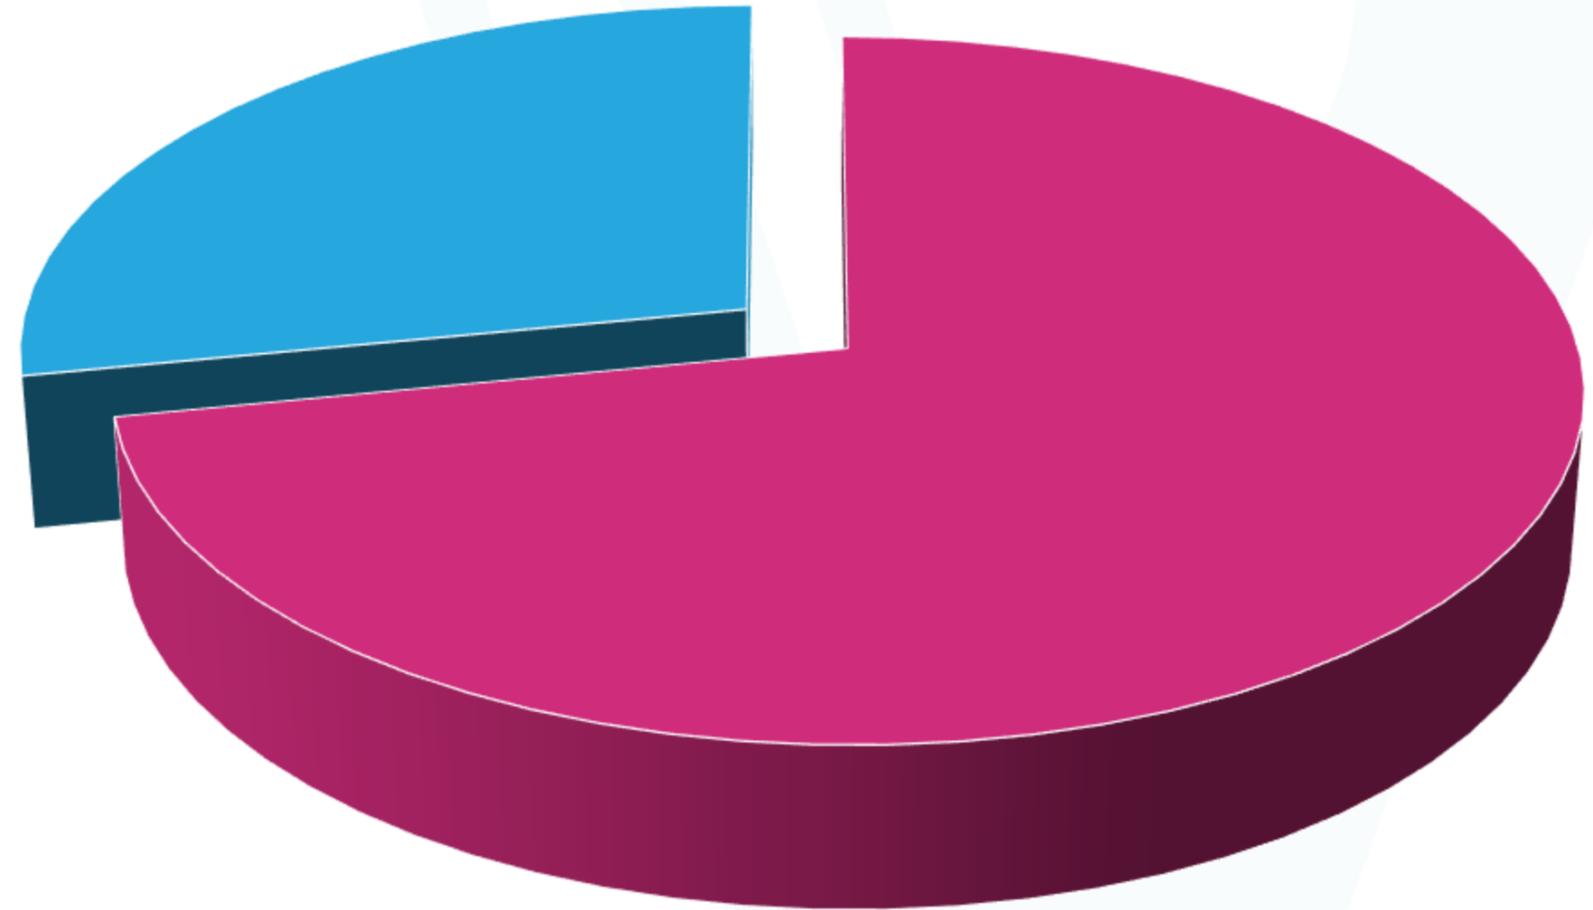

**Fatal**

**Serious Injuries**

# 92% of fatalities occur on High Speed Single Carriageway National Roads,

# They account for only 38% of all veh.km travelled on National Roads

- 100km/h Single Carriageway
- All other (including Motorways and 80km/h single)

Head-On

- **Divided Roads**
- **Reduce Speeds**  
(Speed Limit Review)

NMU

- **Urban Safety**
- **Rural Bus Stops**
- **Reduce Speeds**

N3 Virginia Main St., Cavan 2022

Vehicle to Vehicle

N17(R320) Lisduff, Mayo 2023

- **Reduce Speeds**
- **Segregated Junctions**
- **Reduce Access**

SVC

- **Reduce Speeds**
- **Forgiving Roadside**

# Speed Limit Review

Published 14<sup>th</sup> September 2023

**Action 6 RSS** - A working group established to examine and review the framework for the setting of speed limits on Irish roads.

As part of this review there was a specific consideration of the introduction of a 30 km/h default speed limit in urban areas.

(Stockholm Declaration 2020)

The screenshot shows the gov.ie website header with the harp logo and navigation links for 'Ranna' and 'Comhairliúcháin'. Below the header, the page is titled 'Foilsíú' and 'Speed Limit Review'. It is attributed to 'An Roinn Iompair' and dated '14 Meán Fómhair 2023'. A summary paragraph states that the review fulfills a government commitment and was overseen by a working group.

The document cover features the Department of Transport logo and the title 'Speed Limit Review Main Report'. It includes a link to the report: <https://www.gov.ie/ga/foilsuachan/012b3-speed-limit-review/> and the date 'September 2023'.

# National Road Network

## ✓ *Safety Rating*

# EU RISM DIRECTIVE 2008/96/EC

Transposed into SI 472 of 2011 – TII (NRA) Implementing Body  
EU Directive on Road Infrastructure Safety Management (RISM) are met through Publications

Official Journal of the European Union 29.11.2008 L 319/62 EN

**DIRECTIVES**  
**DIRECTIVE 2008/96/EC OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL**  
**of 19 November 2008**  
**on road infrastructure safety management**

shared responsibility' the Commission identified road infrastructure as the third pillar of road safety policy, which should make an important contribution to the Community's accident reduction target.

(4) In recent years, major advances have been made in vehicle design (safety measures and the development and application of new technologies) which have helped to reduce the number of people killed or injured in road accidents. If the target set for 2010 is to be achieved, action must be taken in other areas too. Managing the safety of road infrastructure offers plenty of scope for improvement, which must be used to advantage.

(5) The setting up of appropriate procedures is an essential tool for improving the safety of road infrastructure within the trans-European road network. Road safety impact assessments should demonstrate, on a strategic level, the implications of an infrastructure project and they should play an important role when routes are being selected. The results of road safety impact assessments may be set out in a number of documents. Moreover, road safety audits should identify, in a detailed way, unsafe features of a road infrastructure project. It therefore makes sense to develop procedures to be followed in those two fields with the aim of increasing safety of road infrastructures on the trans-European road network, whilst at the same time excluding road tunnels which are covered by Directive 2004/54/EC of the European Parliament and of the Council of 29 April 2004 on minimum safety requirements for tunnels in the trans-European road network (4).

Article 7  
**Data management**  
Member States shall ensure that for each fatal accident occurring on a road referred to in Article 1(2) an accident report is drawn up by the competent entity. Member States shall endeavour to include in that report each of the elements listed in Annex IV.

Article 8  
**Information and communication of guidelines**  
Member States shall ensure that guidelines, if they do not already exist, are adopted by 19 December 2011, in order to facilitate the application of this Directive by the competent entities in the application of this Directive.

**Our Journey Towards Vision Zero**  
Ireland's Government Road Safety Strategy  
**Phase 1 Action Plan 2021-2024**

An tSeirbhís  
Department of Transport

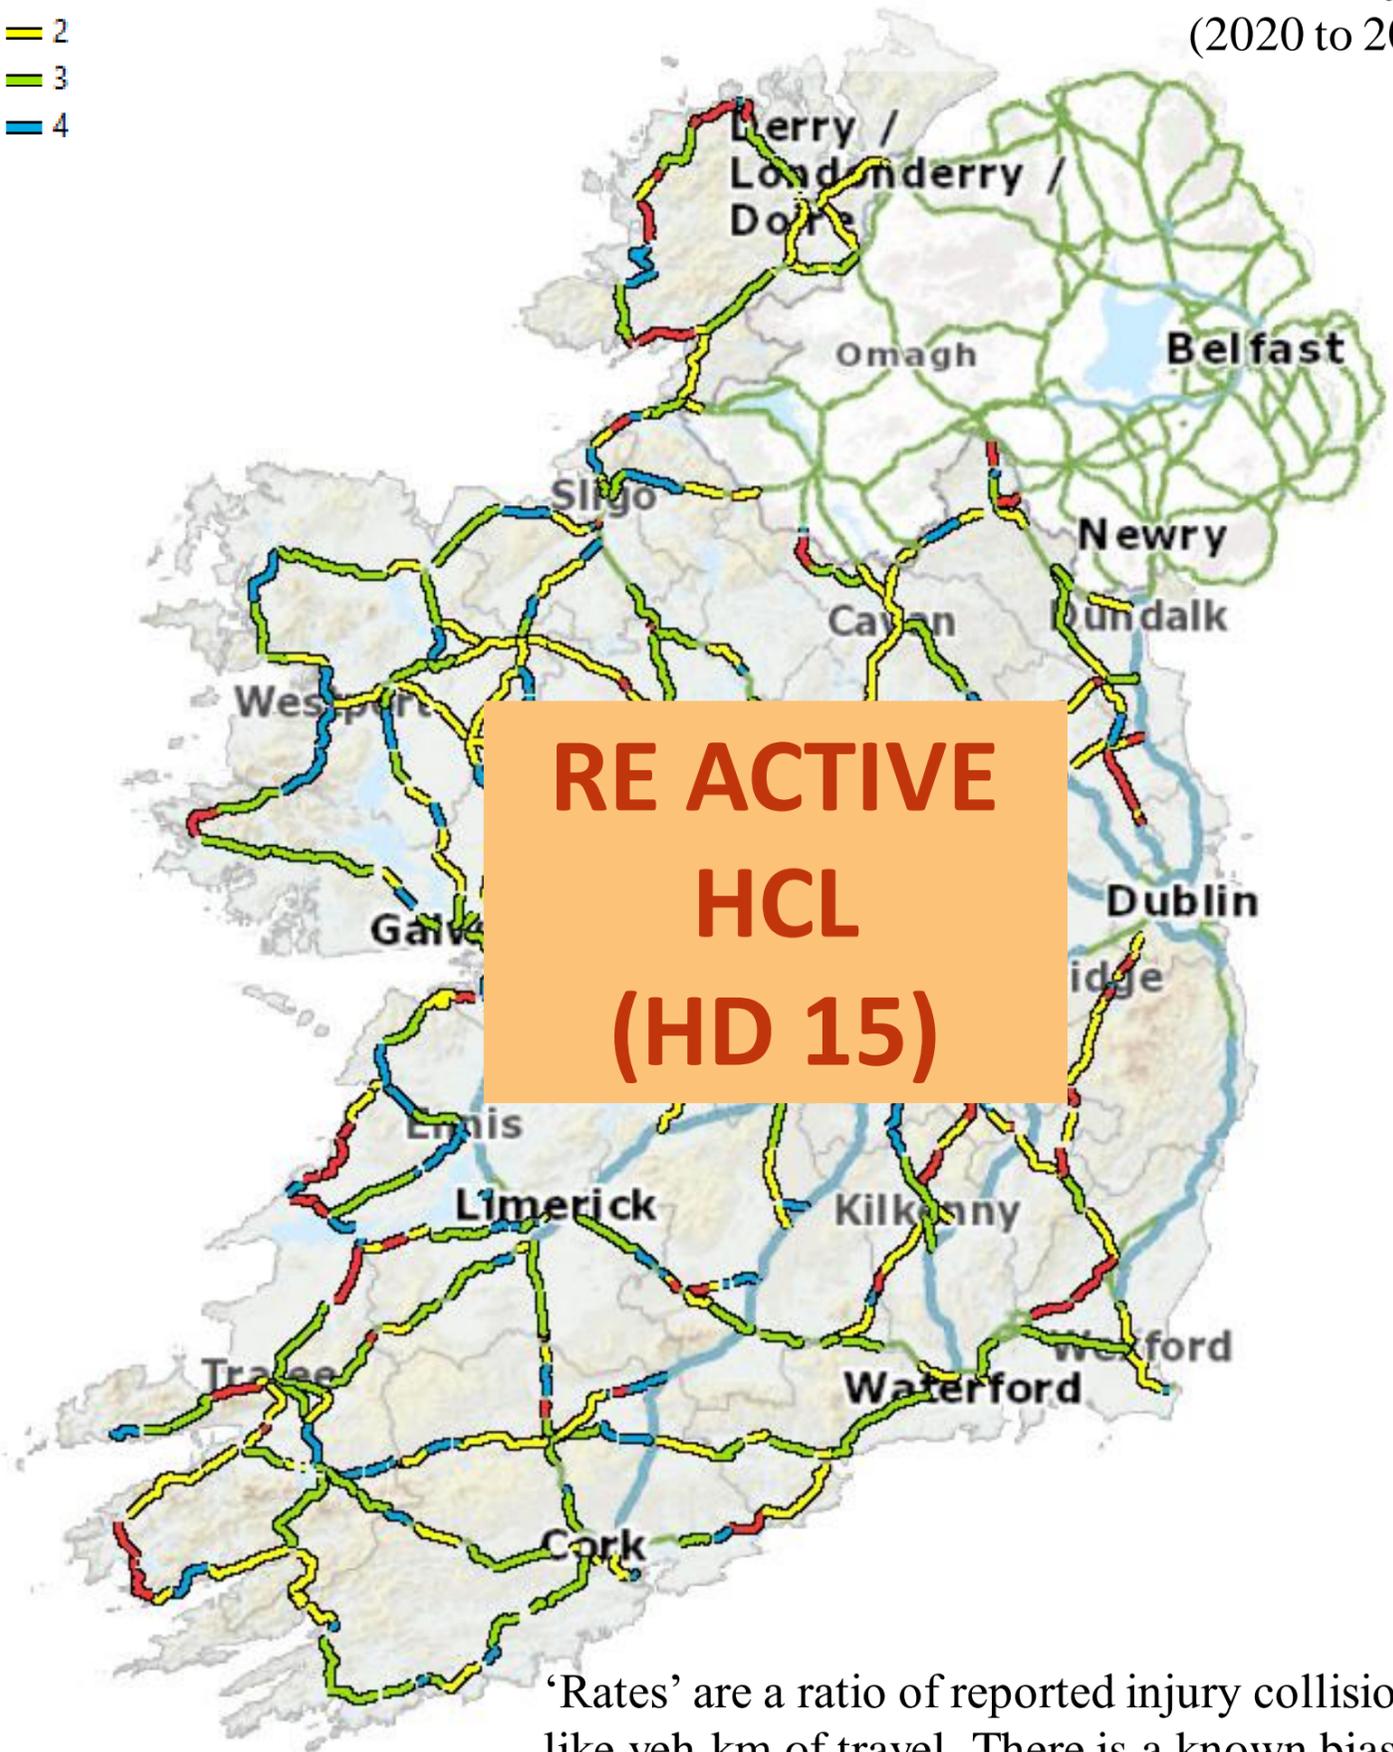

**VISION ZERO**

**Action 1: Safety Rating informing investment by 2024**

# Collision Rate Analysis

(2020 to 2022)

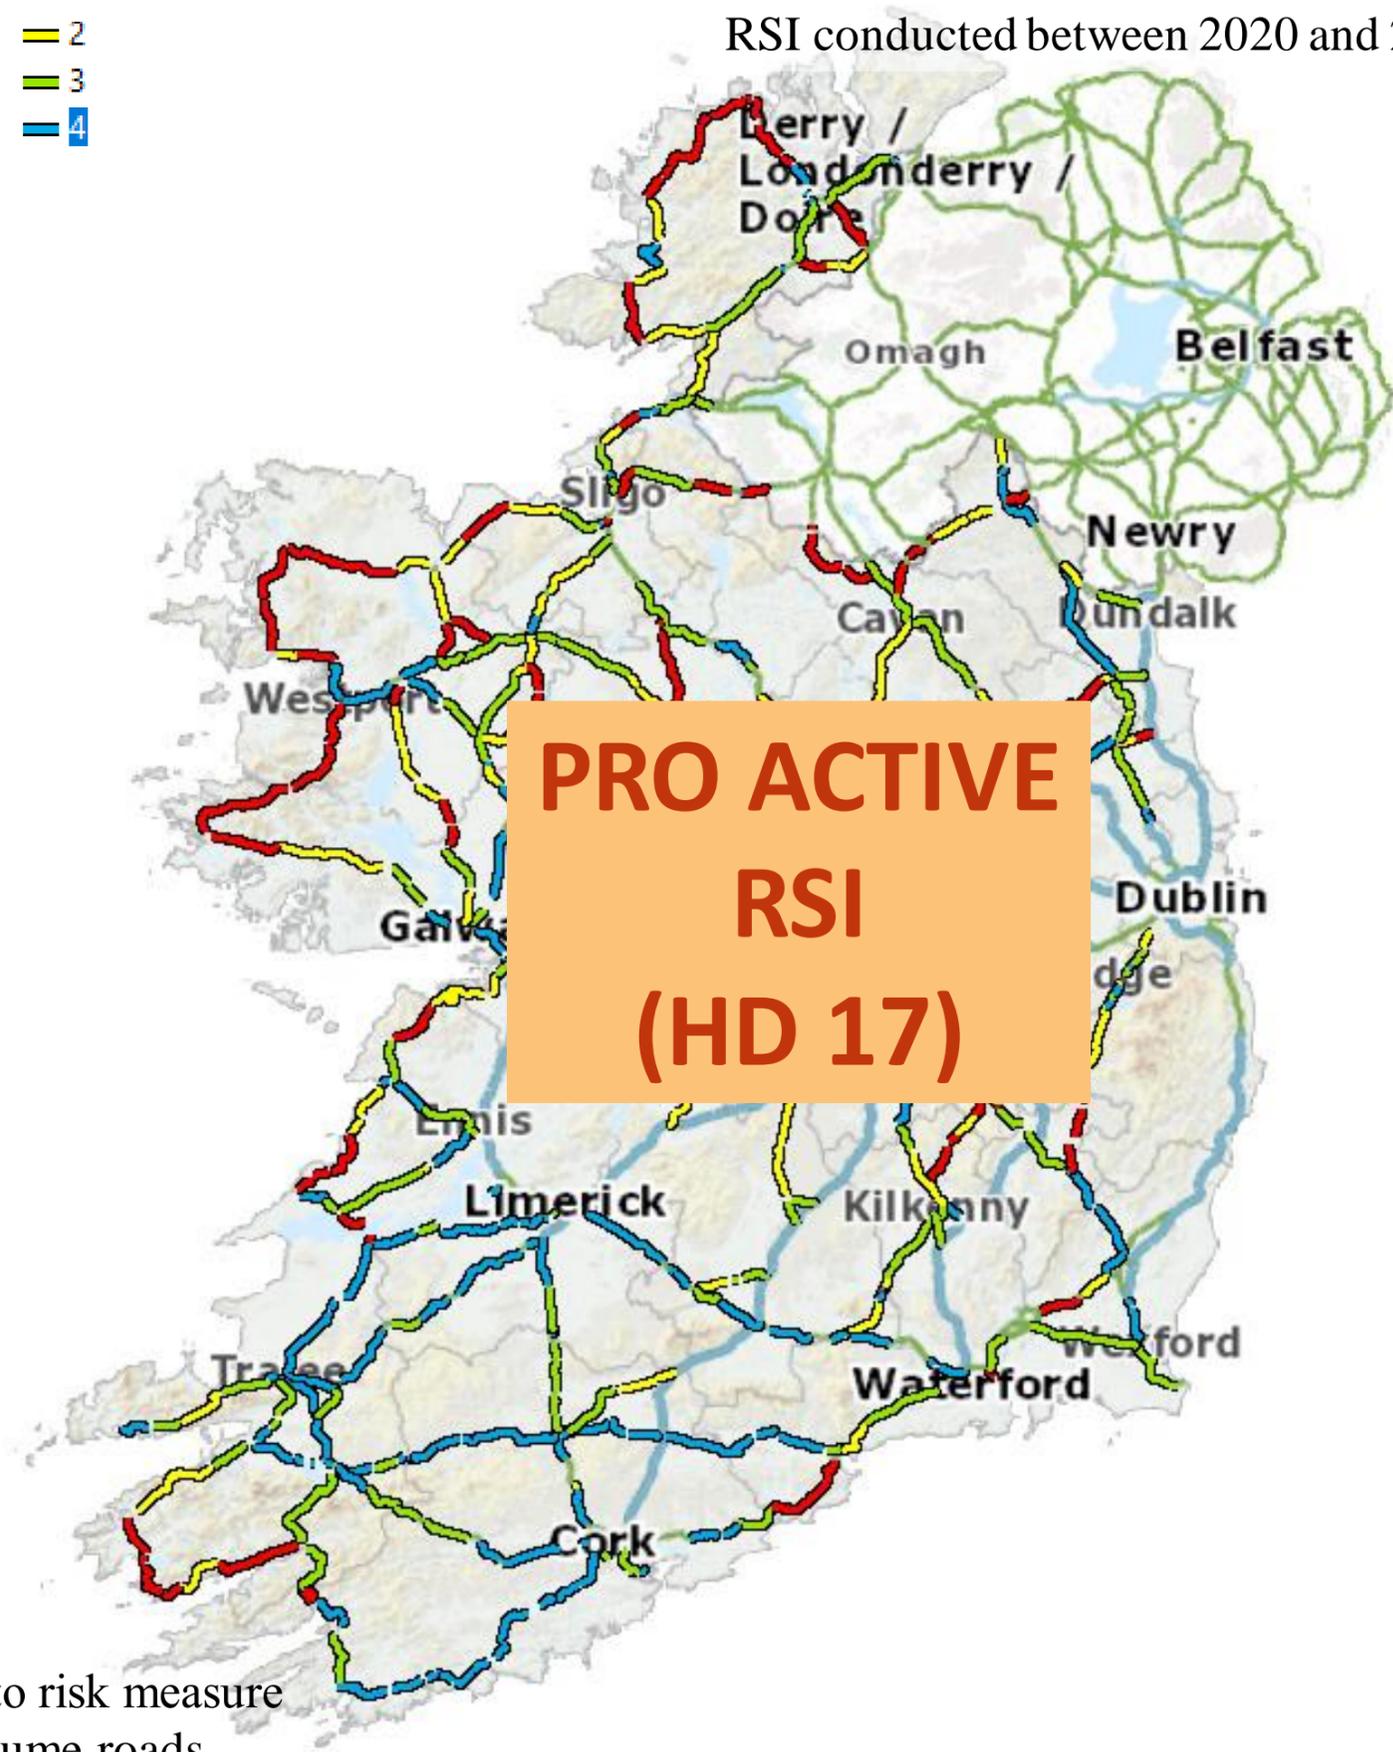

- Coll\_Rate\_Level
- 1
  - 2
  - 3
  - 4

# Observed RSI Item Rate Analysis

RSI conducted between 2020 and 2022

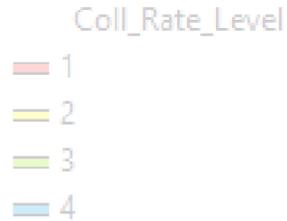

- RSI\_Rate\_Level
- 1
  - 2
  - 3
  - 4

‘Rates’ are a ratio of reported injury collisions to an exposure to risk measure like veh km of travel. There is a known bias towards lower volume roads.

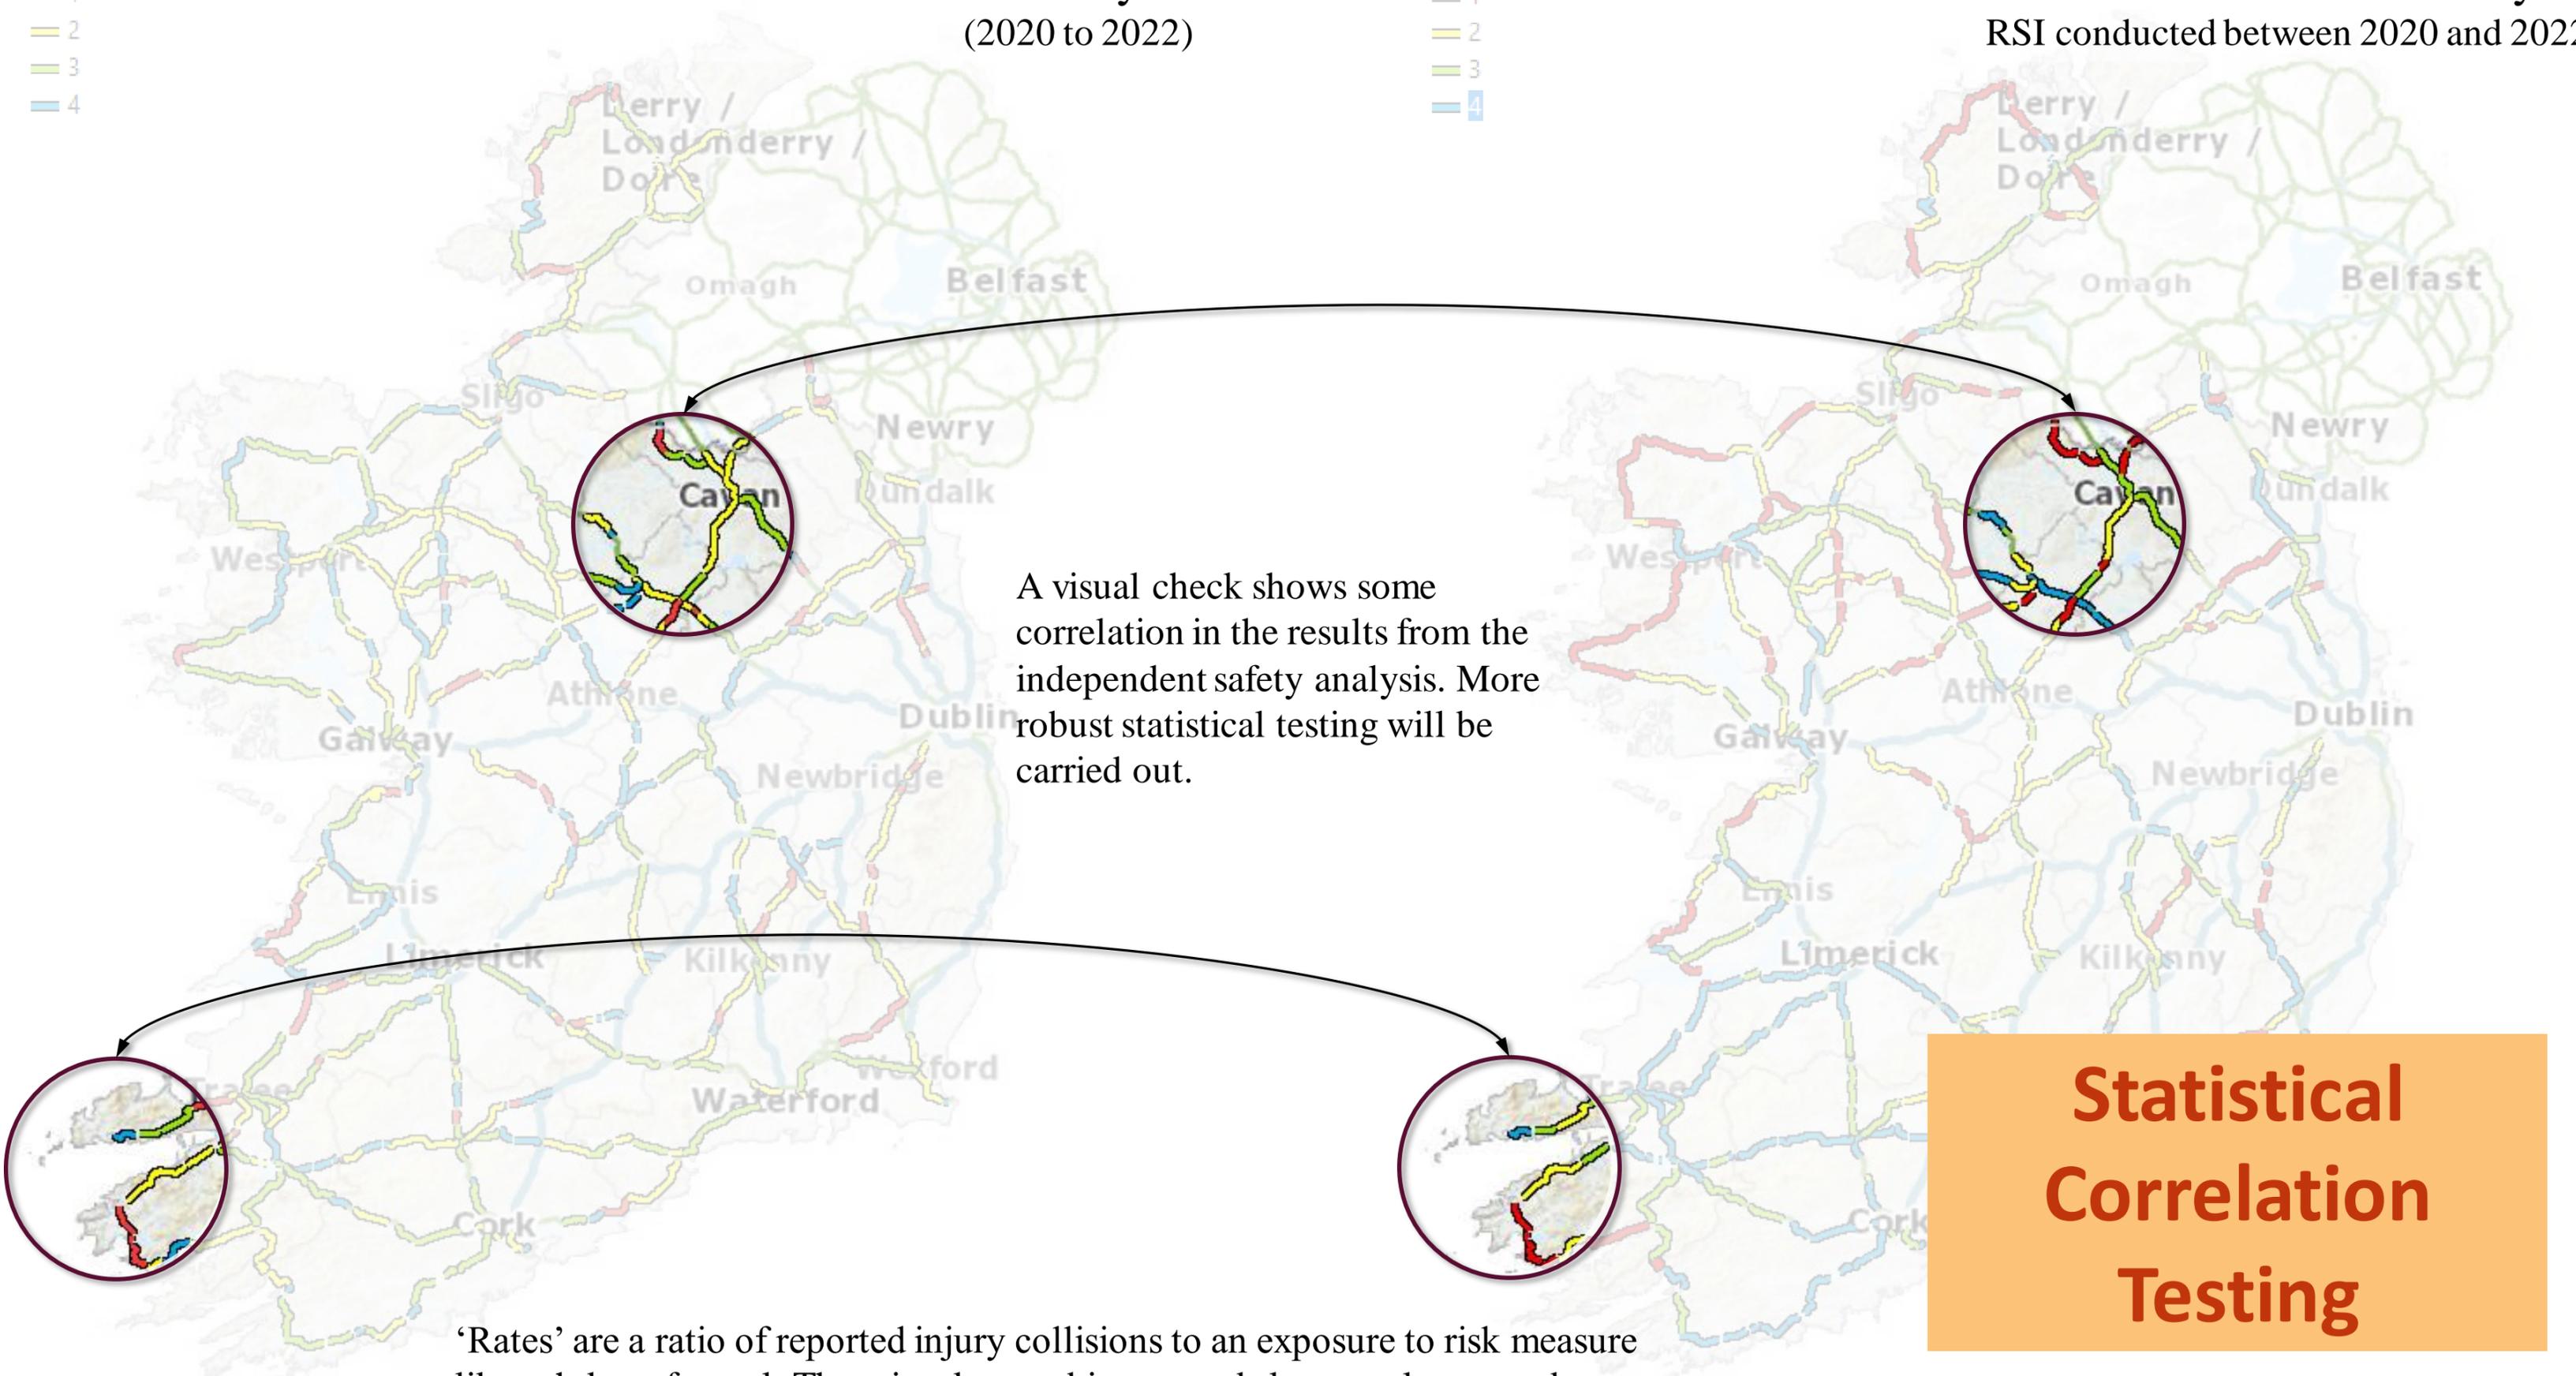

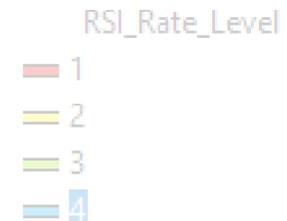

# Collision Rate Analysis

(2020 to 2022)

# Observed RSI Item Rate Analysis

RSI conducted between 2020 and 2022

A visual check shows some correlation in the results from the independent safety analysis. More robust statistical testing will be carried out.

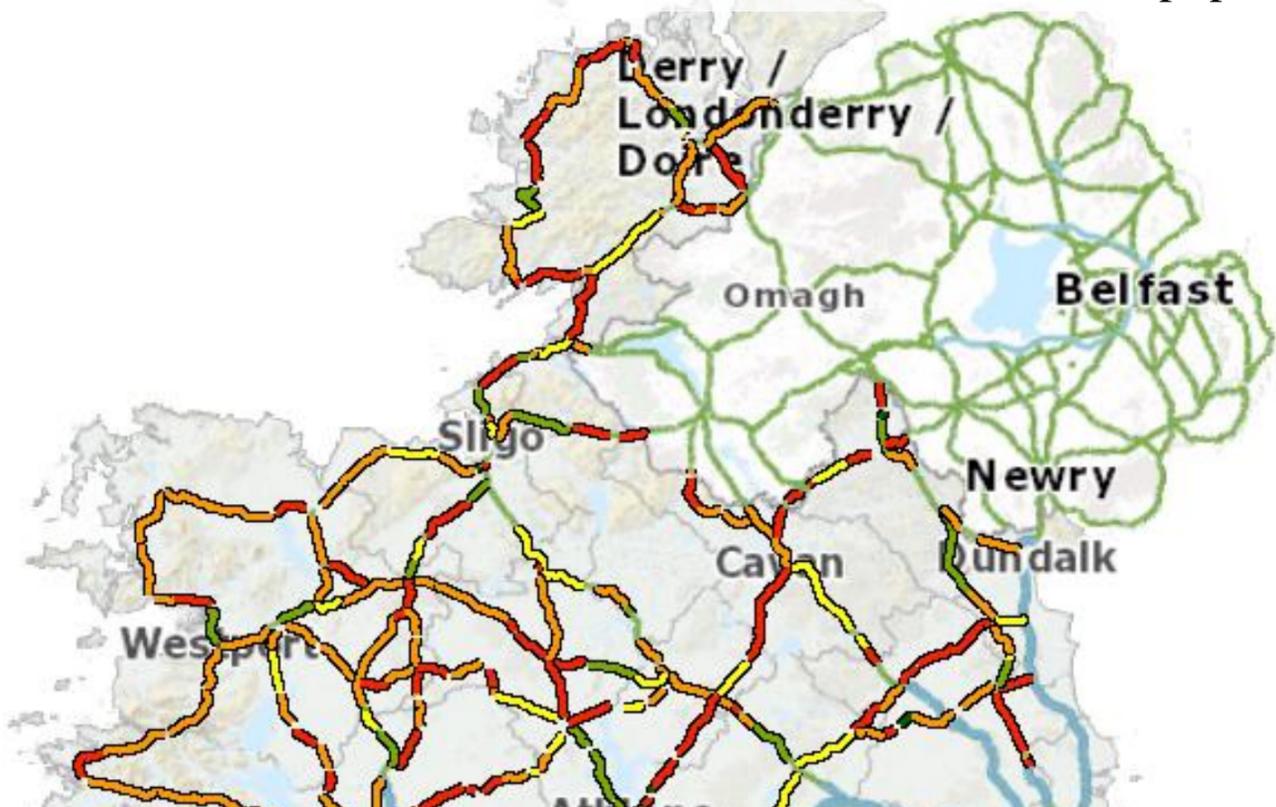

**Statistical Correlation Testing**

‘Rates’ are a ratio of reported injury collisions to an exposure to risk measure like veh km of travel. There is a known bias towards lower volume roads.

# Network Wide Safety Ranking

For rural 2-lane reference population

- NWSR
- A
  - B
  - C
  - D
  - E

Reported collision rate classification

		1	2	3	4
RSI observer issue rate classification	1	E	E	D	D
	2	E	E	D	C
	3	E	D	C	B
	4	E	D	B	B

## Action 1 Outcome – Network-wide Road Safety Ranking

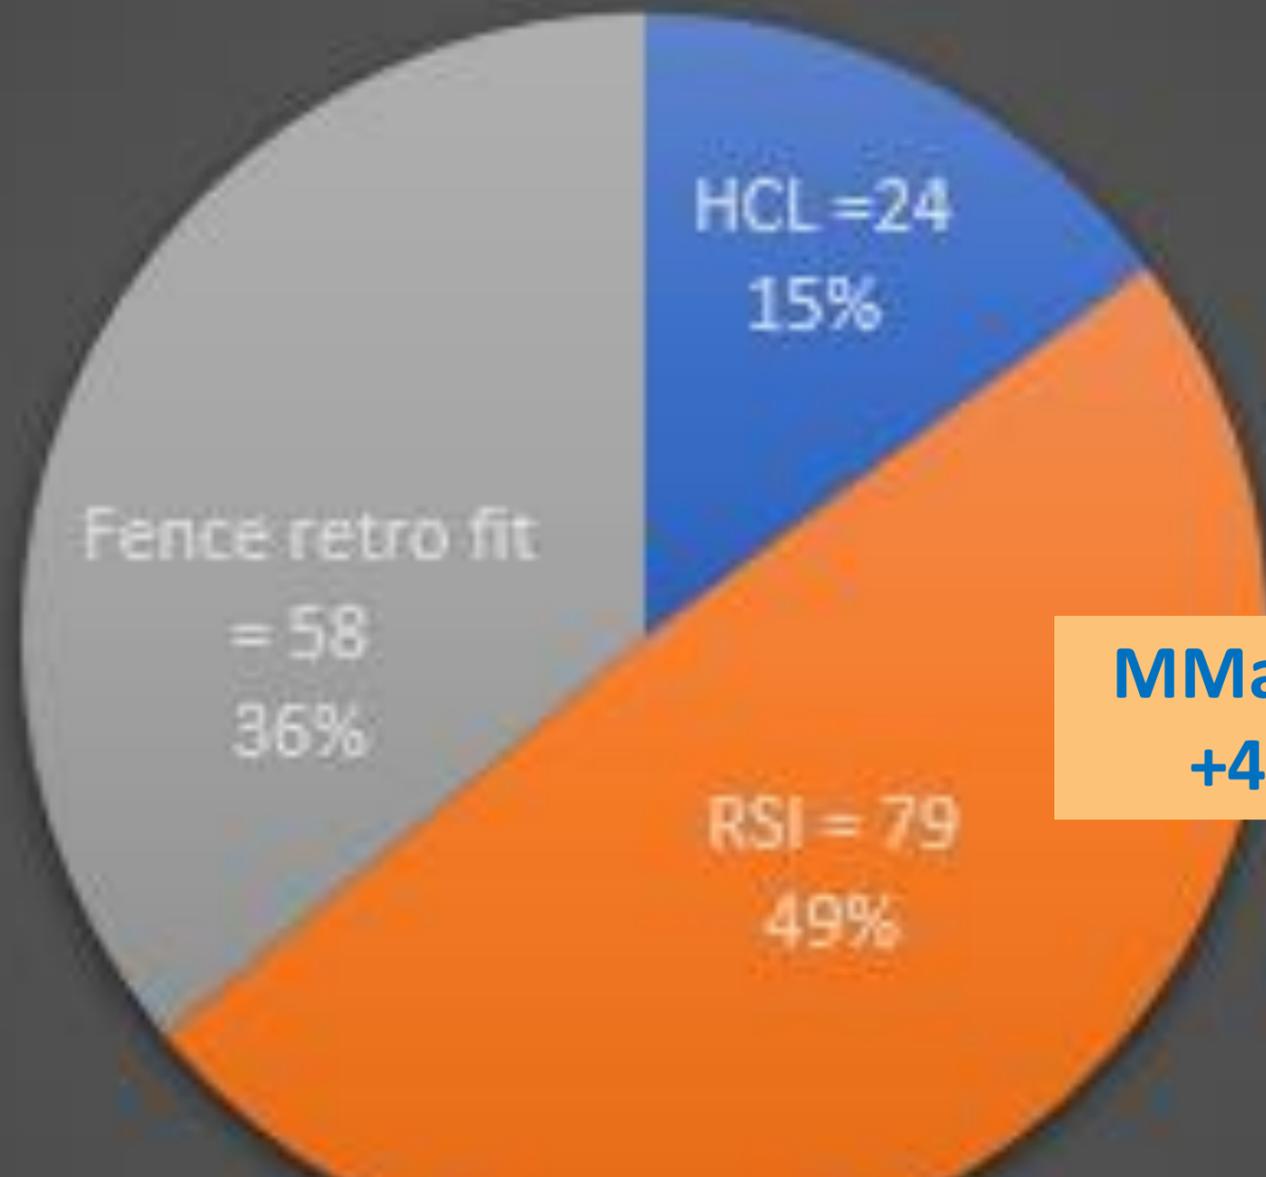

Classification	Length KM	%
A	31.551	0.9%
B	765.765	22.1%
C	547.544	15.8%
D	1186.841	34.2%
E	940.055	27.1%

RSS Action	TII is the Lead Agency	2022	2023
1	Safety Rating by 2024	Testing/Beta	On-target
2	60 Safety Improvement Schemes (RSIS) each year	over 60	On-target
63	Fund dedicated LA Road Safety Engineers	-	4/5 Appointed

## Outcomes

Phase 1 2022 -2026  
Phase 2 2025-2027  
SPI / KPI

04

## Actions

03

Action 1  
Action 2  
Action 3  
Action 4

## Vision Statement

02

Objective 1 - Safe and Efficient  
Objective 2 - Integrated Mobility  
Objective 3 - Decarbonise

## Safety Problem

01

- Hazards in road side
- Pedestrian movements
- Vehicles turning or merge/diverge

# M1 Pilot – Ex-Post Evaluation - Customer Survey (2023)

- High level of satisfied users
- Main motivation - reduce transport cost
- Main destination is Dublin
- Customers report that they previously used hard shoulder to park
- Facilities feedback
  - Feel safe
  - would like a longer set down area,
  - Shelter while waiting for pick up,
  - A coffee station,
  - Less litter, and
- Increased signage on the M1.

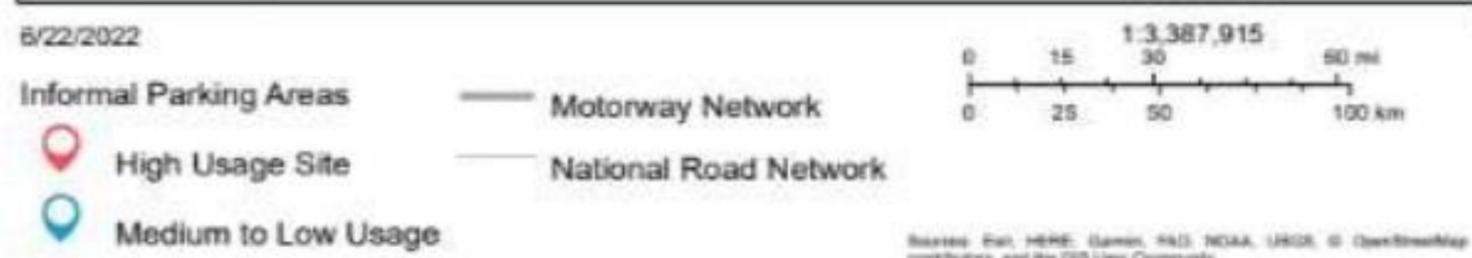

# Sites Identified by TII 2018

## TII Reviewed Network 2022

– *increased sites and intensification at existing sites.*

- Increased pressure to reduce single occupancy car use and private car trips
- Increased transport costs

# Implementation Challenges for TII

## Administrative Challenge

- Can a new access be provided on a National Road for the purposes of a Park and Share facility? (Spatial Planning and National Roads Guidelines 2012)
- Not all P&S – Some P&R required where known bus stop causing parking (remit?)

## Communications Challenge

- Do we need a customer platform? Occupancy , disability , map etc.?

## NR2040 Funding Challenge

- Are we only treating National Road Jn or are Regional Rd junctions with Motorway also to be considered?

## Size and Number of Facility

- One large vs numerous small facilities at junctions
- Land available at junctions

## Electric Charging Provision

- Are Electric Charging points required?

## Road Safety Challenge

RISM and RSS

How have other NRA's integrated P&S into their Operations ?

Austria (ASFiNG)

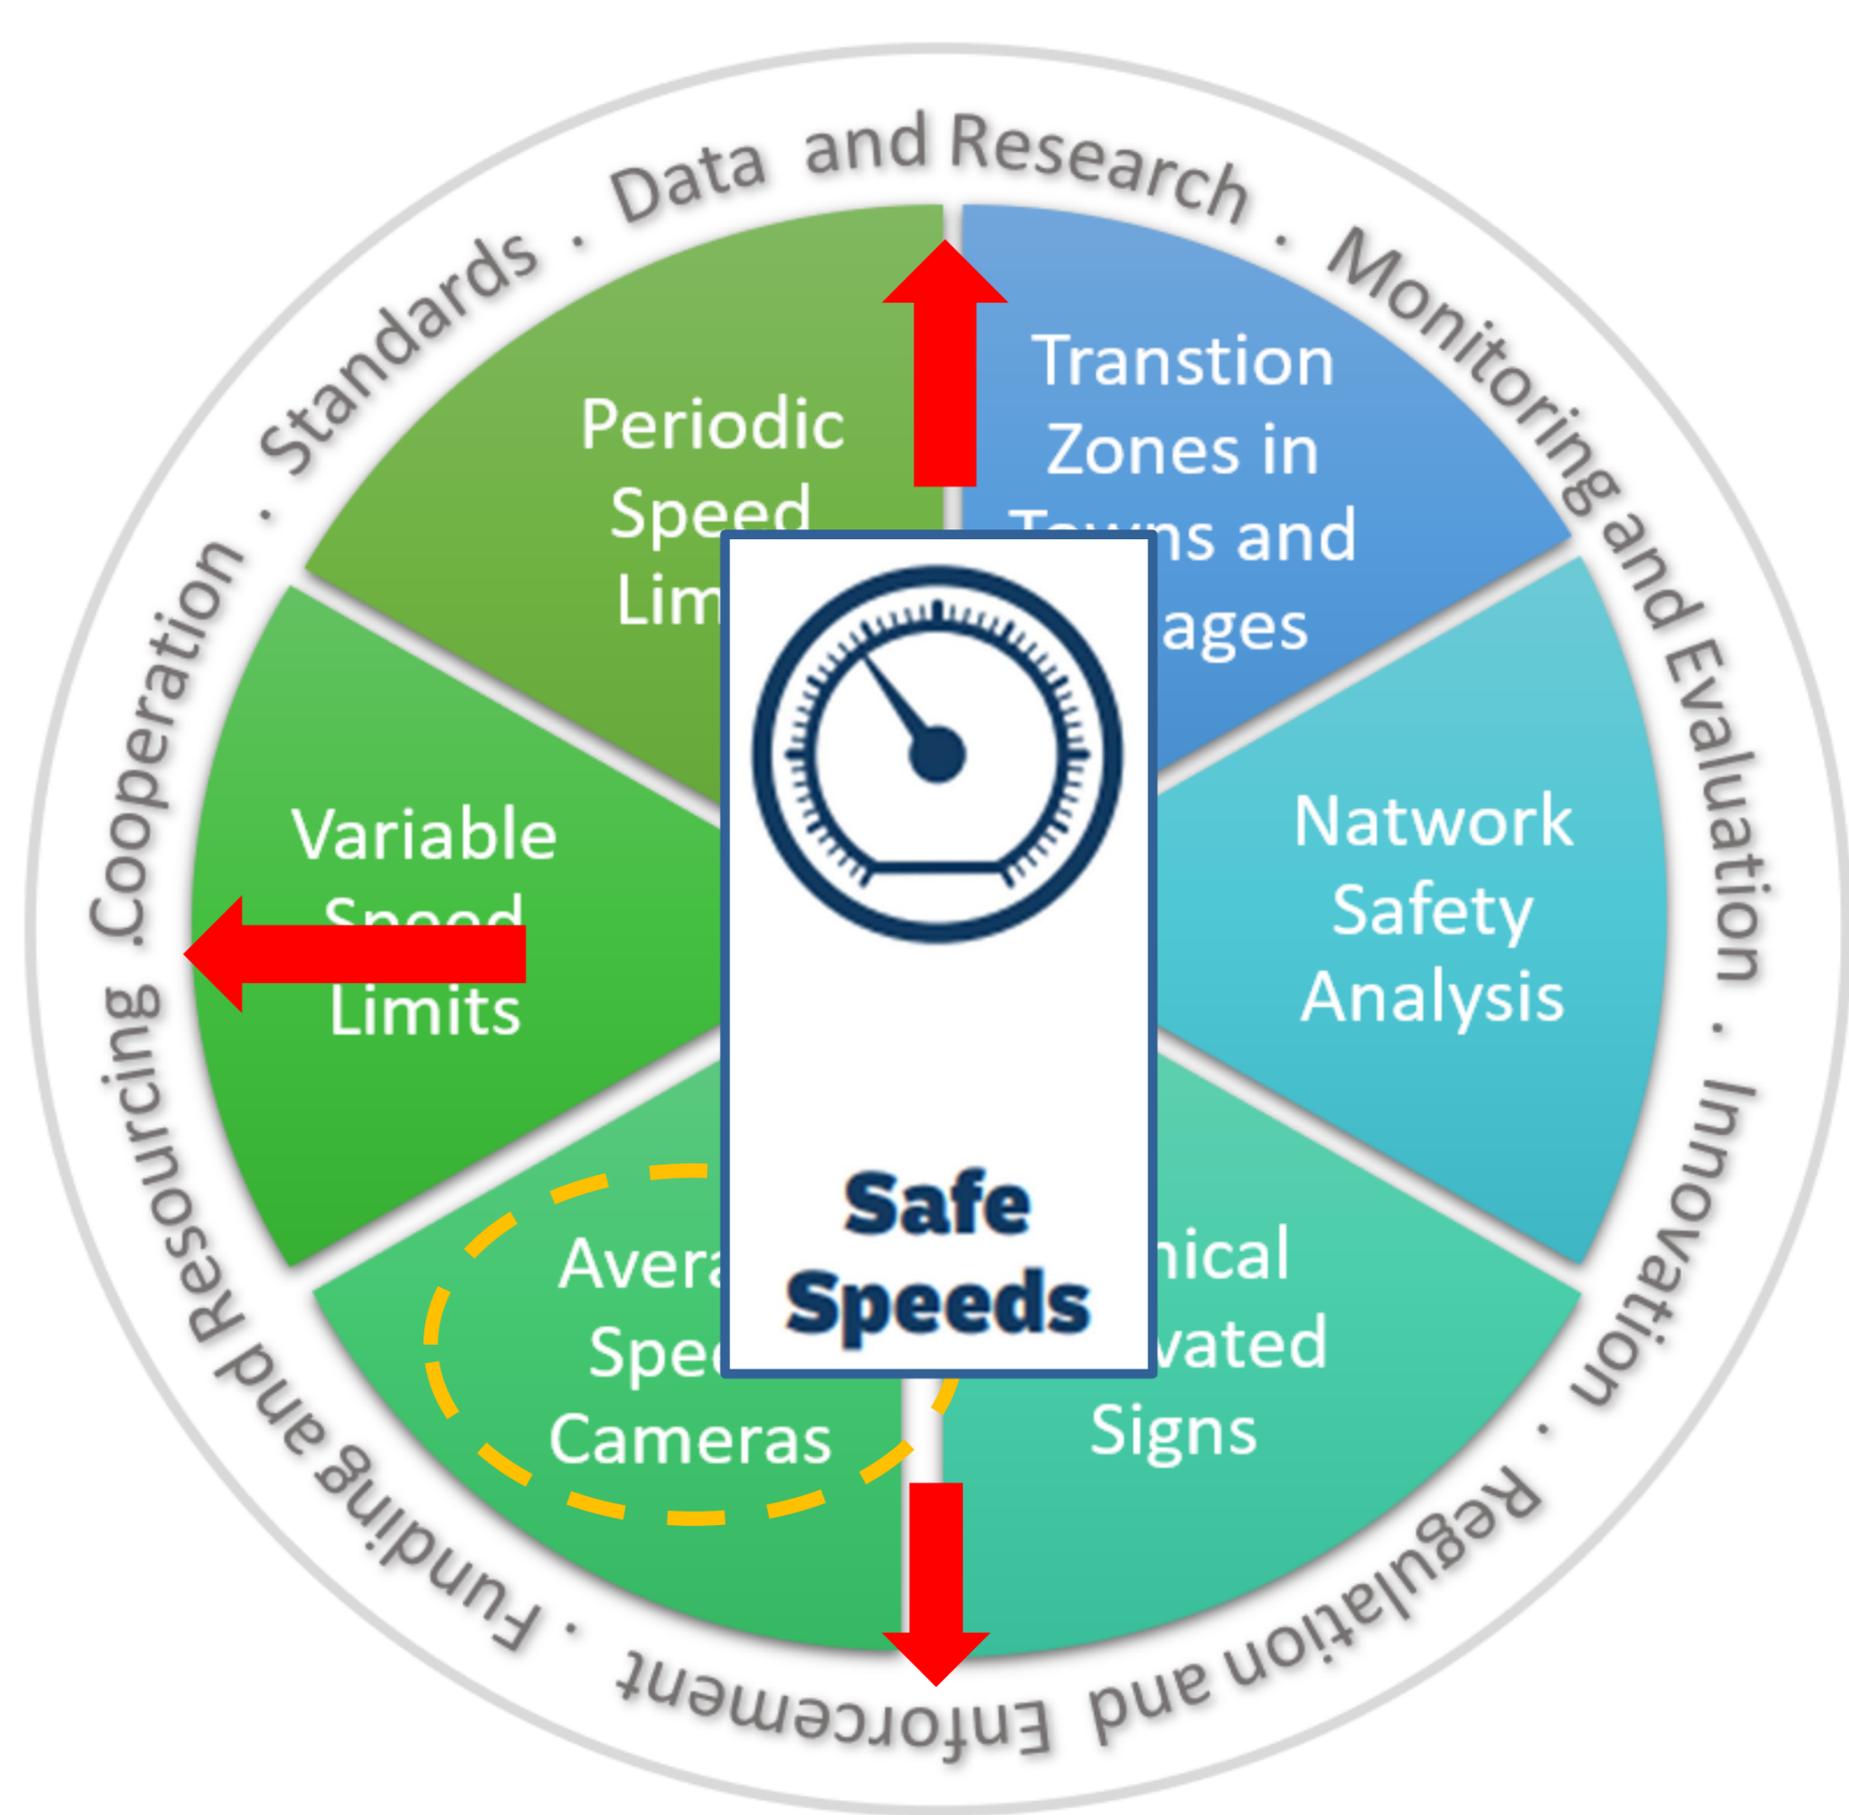

The screenshot displays the ASFiNG website interface. At the top, the navigation menu includes: ASFiNG, Toll & Vignette, Traffic & Safety, Build & Maintain, Parking & Resting, Jobs & Career, and About us. Below the navigation is a section titled "Filter Park & Drive facilities". Under "P+D Services", there are several filter buttons: "Public transport stop (11)", "Lighting (47)", "E-charging stations (2)", "Wireless (1)", and a partially visible "K" button with a bicycle icon. A "See more filters" link is also present. The main content area features a map of Austria with numerous blue location pins indicating the presence of various services. Major cities like Salzburg, Linz, and Wien are labeled. At the bottom of the map area, there are three utility buttons: "Traffic information" (Up-to-date traffic information), "Webcams" (ASFiNG Webcams), and "Route planner" (Plan your route).

# Speed Management

## *Average Speed Cameras*

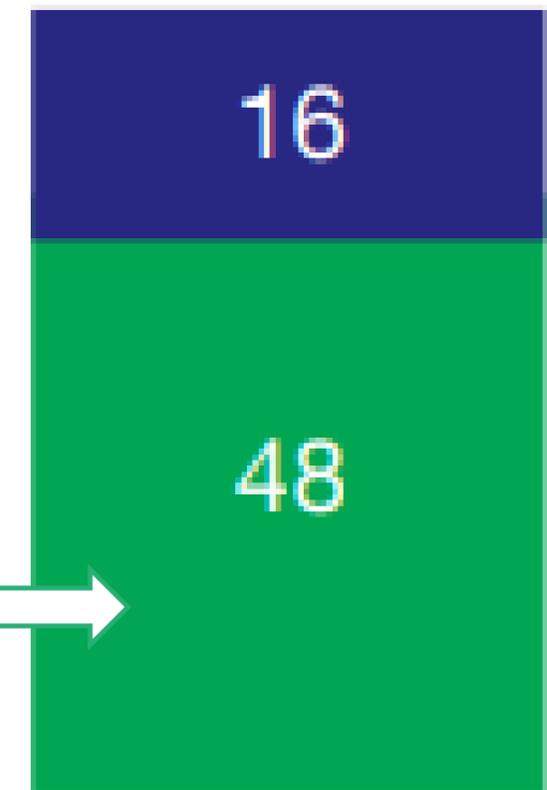

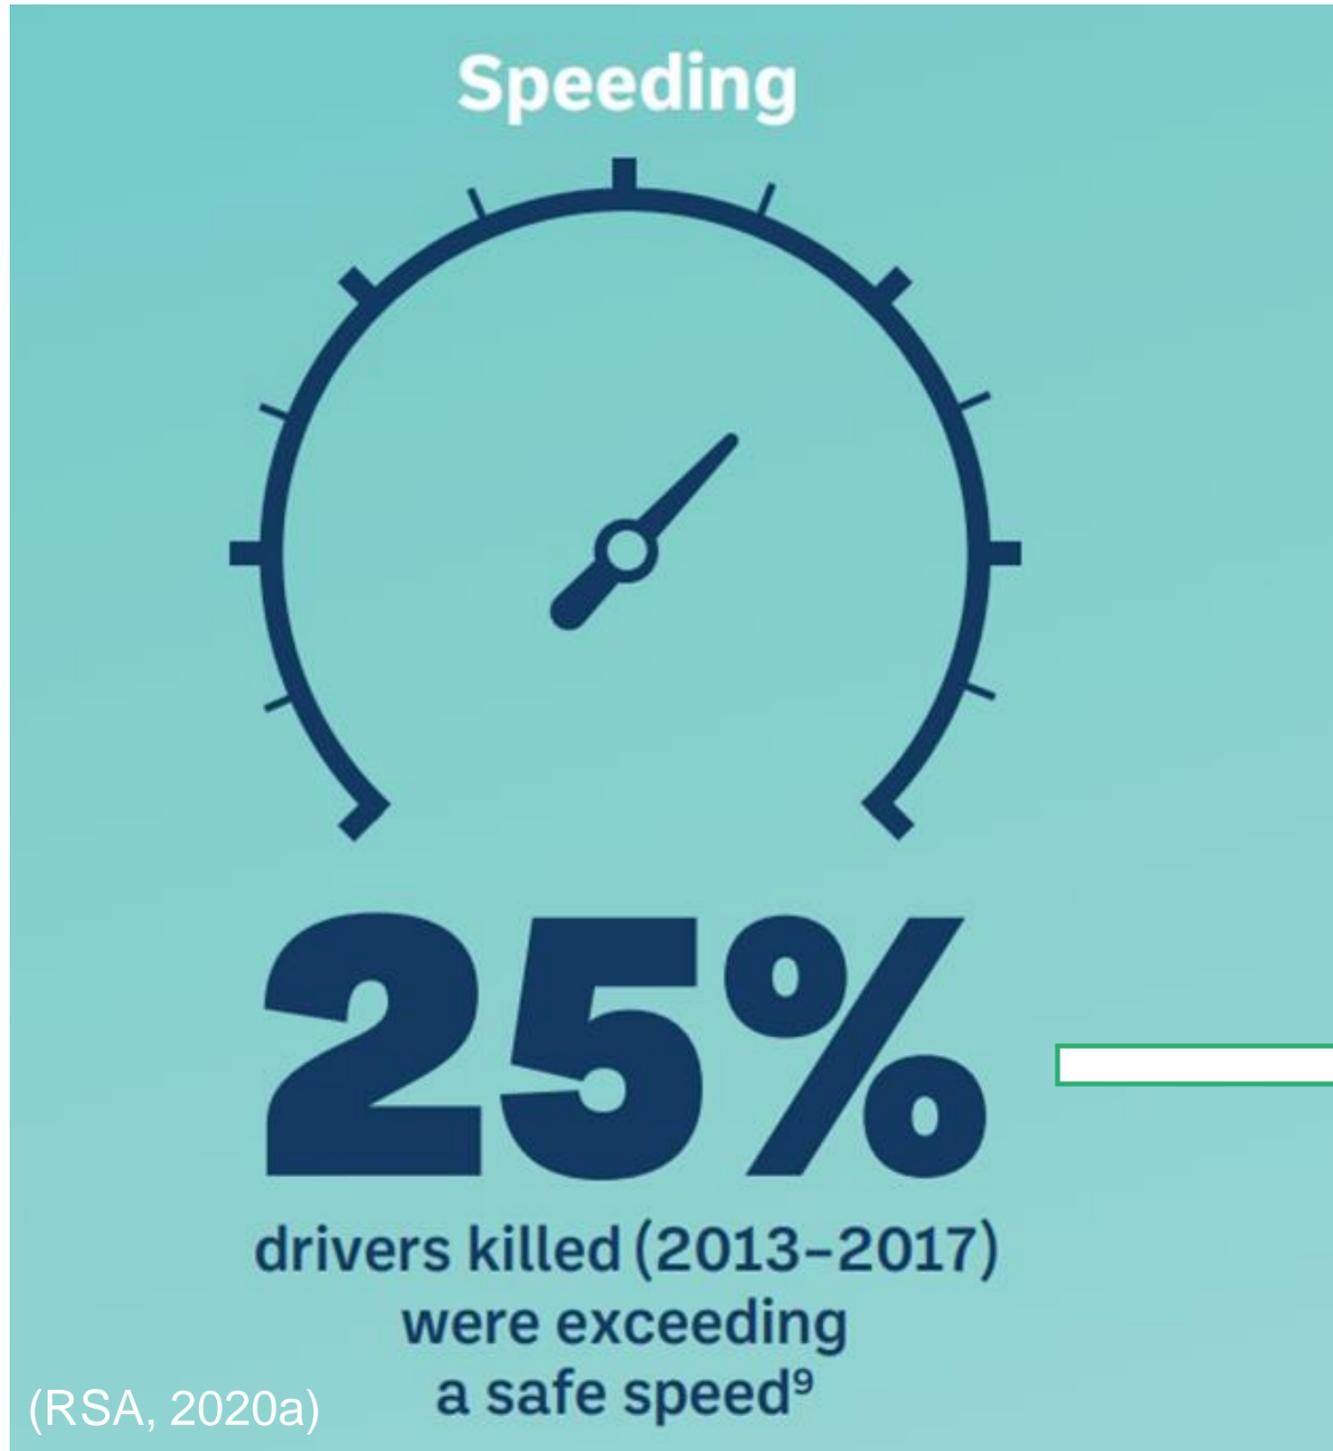

**RSS Action 8**  
 Expand speed management measures  
 (RSA, 2020b;Pg 5)

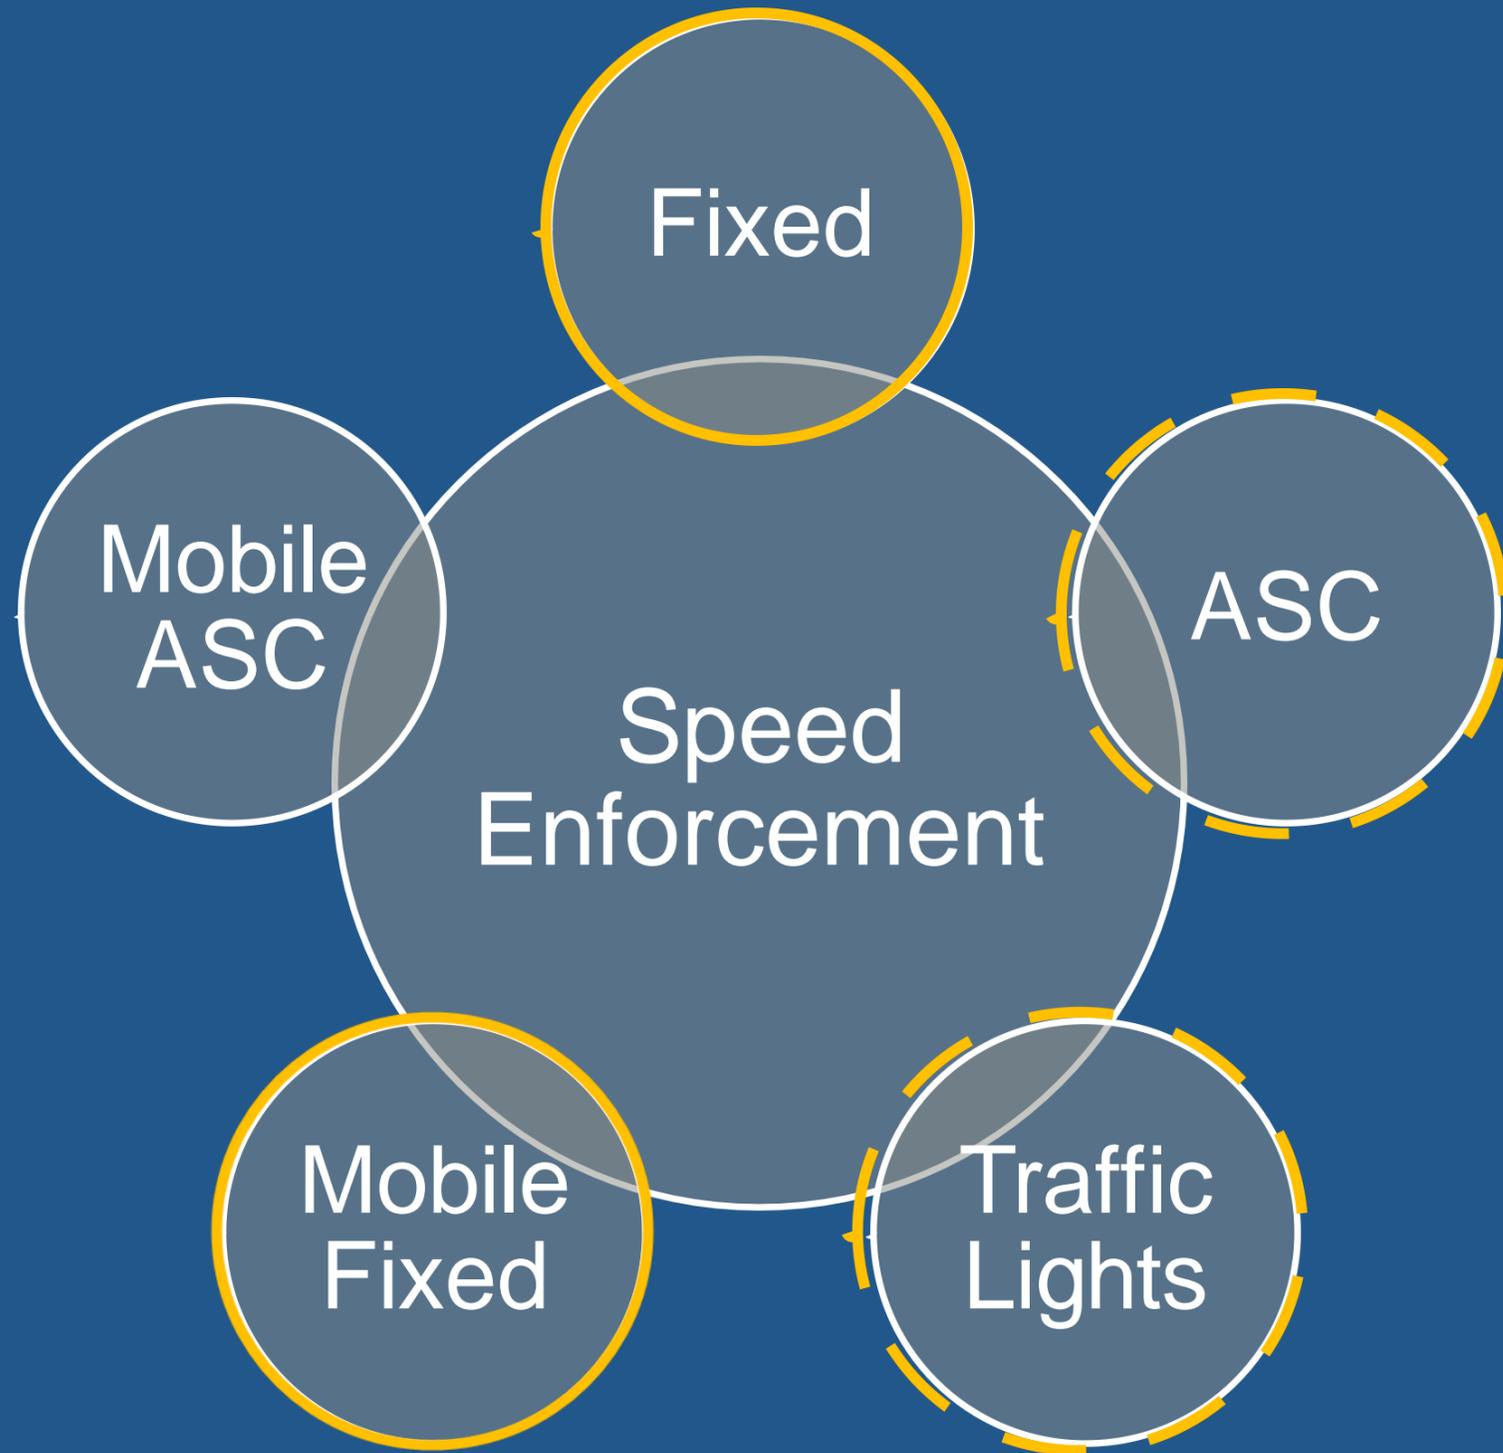

*34% of Irish drivers say its acceptable to exceed 100 km/h speed limits by more than 10 km/h.*

An increase from 2014-2019 at 18%.(RSA, 2020a)

**Fatalities**

## Static Options

**Fixed spot-speed** – measuring speeds at the spot  
**ASC** / Point-to-point (P2P) cameras/Section

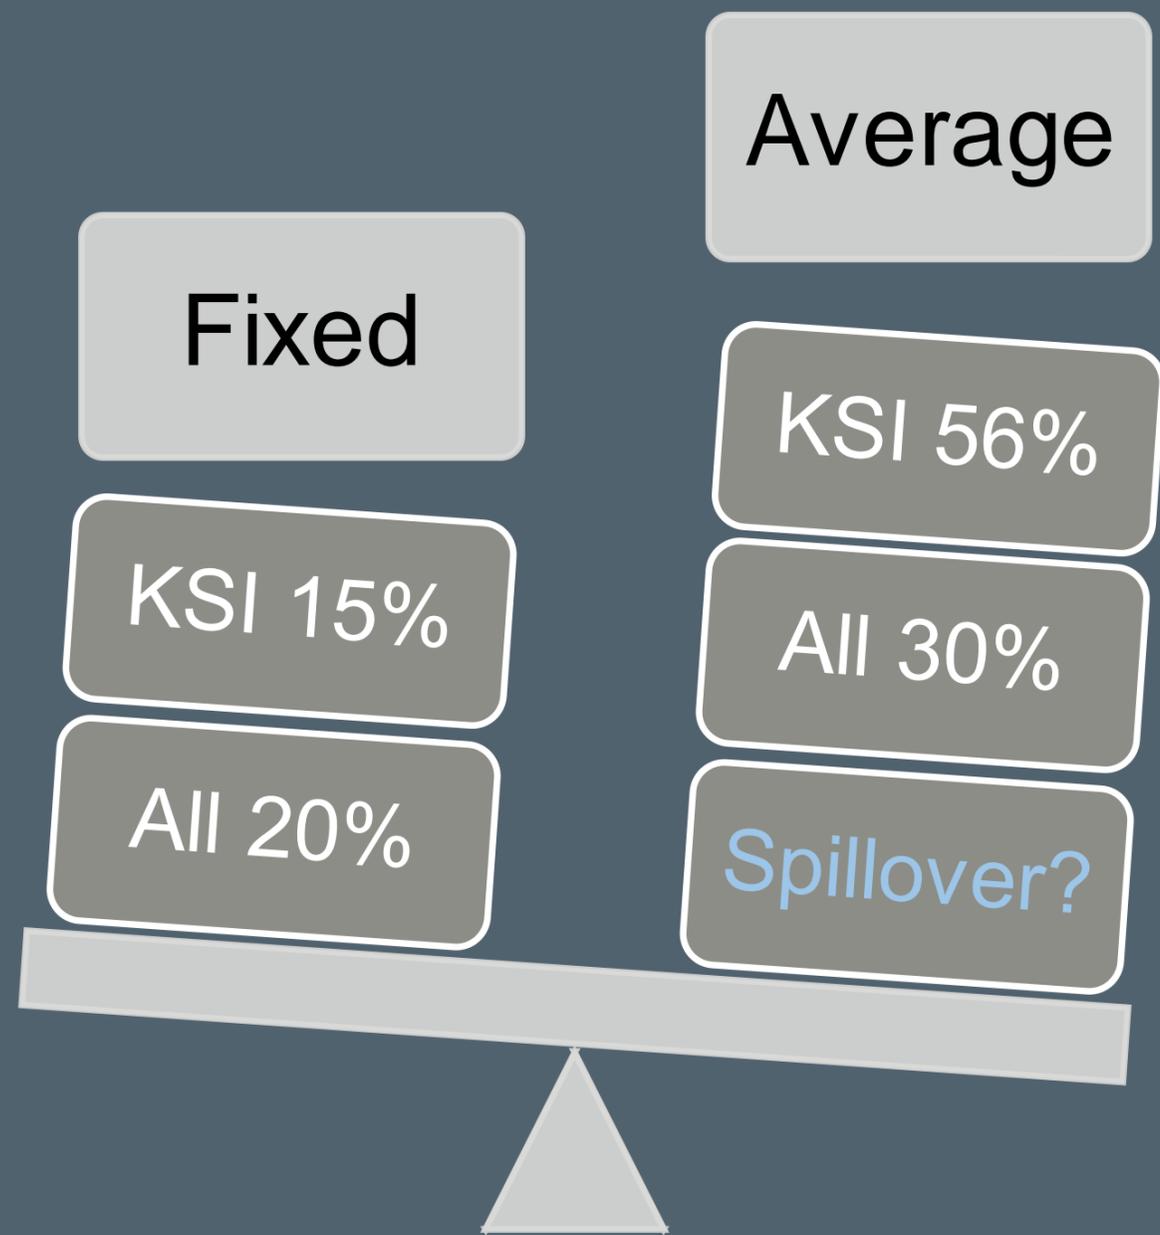

Control- measuring average-speeds over a route/section,

**Red-light**/speed cameras at signalised intersections - measuring spot-speeds on an approach road as well as red-light running offences.

## Mobile Options

**Mobile speed cameras** (MSC) measuring spot – speeds - moved from location to location to for a period of time

**Mobile ASC** / P2P camera units measuring average-speeds over each pre-defined road section for a period of time ( e.g. TTM)

*(Adapted from Høye, 2014)*

- Technical Report
- Literature Review
- Effectiveness
- Best Practice
- Site Selection
- Cooperation

## ***Best Practice Approach***

*(Scotland, Belgium, Sweden)*

- 1) Speed-related collisions  
where Engineering & Education  
not effective/possible***
- 2) High Collision Rates***
- 3) High % Exceeds Mandatory  
Speed Limit***
- 4) Partnership***

**Urban Dual Carriageway (41 KM)**

**2018 to 2020**

**Urban 2-Lane (508 KM)**

**2018 to**

**Rural 2-Lane (3,478 KM)**

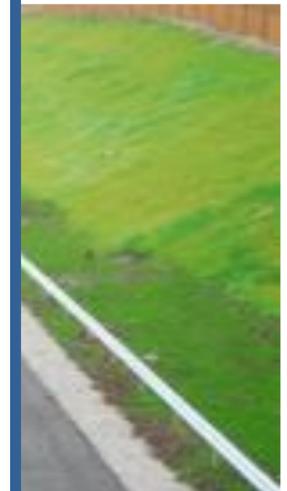

**2018 to 2020 Collision Rate = 6.797**

N56

# ASC - Global Speed Enforcement Solution?

## Safe Speeds

N24 Carrick-On-Suir Urban Street

N71 Legacy Road Network

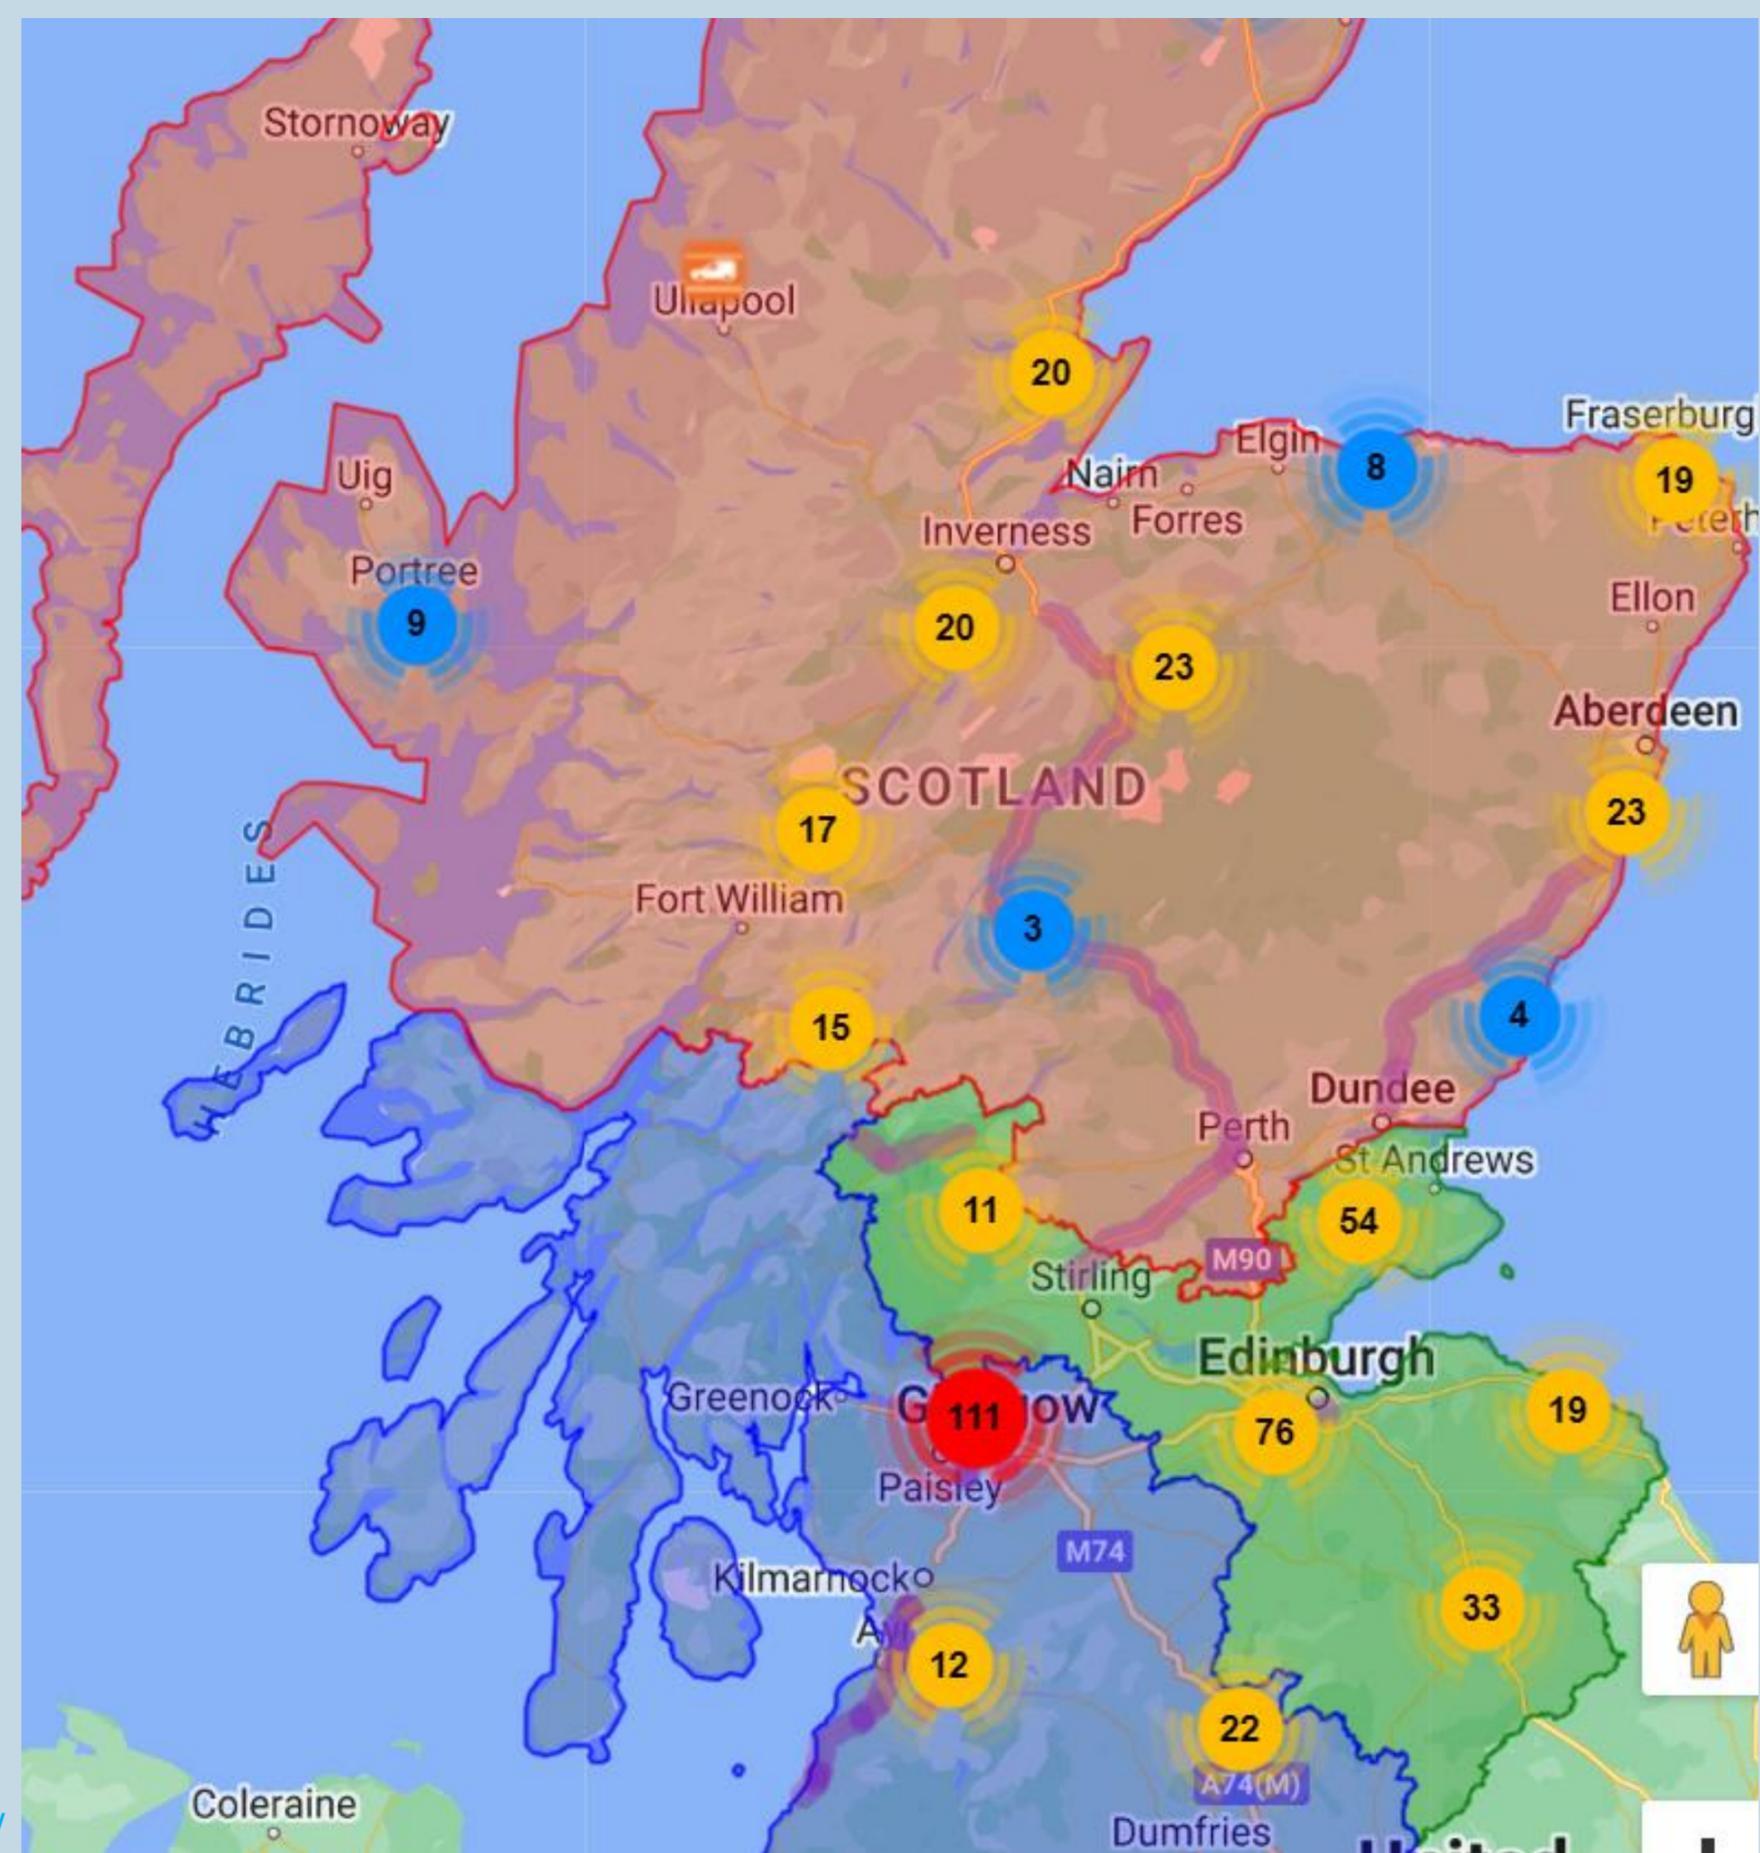

# ASC Scotland

1. **Rural ASC** - 158 km Total Length. 4 sites (6.8% of network) @ A9, A77, A82/A85 & A90) - 66% reduction.
2. **Urban ASC** – Various: Glasgow, Edinburgh and Aberdeen
3. **Mobile ASC** - Temporary for Road Works - 1 Site and more planned

## In addition to...

4. **Red Light /Speed** - Various sites @ urban junctions
5. **Mobile Cameras** - 29 Vans @ across many sites
6. **ITS** - Queensferry Bridge

# Overview

1. Role of TII Road Safety
2. Safety Trends and Rating (**Action 1 & 2 - RSS**)
3. Speed Limit Review (**Action 6 - RSS**)
4. TII Park and Share Programme (**Action 71 - RSS**)
5. Speed Management – Average Speed Cameras (**Action 8 - RSS**)
6. Dedicated Road Safety Engineer resource (**Action 63 – RSS**)

## **7. Next Steps**

**Action 53** – Await outcome of *Go! Speed Limit Review* and evaluate median barrier need on NRN.

**Action 63** – Monitor impact of DSE. Increase role out with DoT.

**Action 71** – Route level reviews on-going review opportunity for integrating P&S.

**Action 8** – Complete Technical Paper ASC for DoT.

# Achieving Vision Zero Challenges for TII and Stakeholders?

**Planning Processes** – Urban RSIS hindered/Stalled

**Capacity/Resource Availability** -

**Changing users** – P&S, e-scooters, SUV, active travel, commuting.

**More complicated Safety Interventions required** – e.g., closing some accesses/roads

# Thankyou

*Go raibh míle maith agaibh*
